Independent auditors' report

ANNUAL REPORT ON THE ACTIVITY

SOFIYSKA VODA JSC

31 DECEMBER 2016

Financial Review:

The financial statement was prepared in compliance with the International Financial Reporting Standards (IFRS), approved by the European Union

In 2016 company's revenue from main charges amounted to BGN 132.2 M, which is 4.29% higher than the revenue from main charges in the same period of previous year – BGN 126.7 M. The main reason is the update of the number of active customer accounts, as well as the increased consumption as compared to 2015. The Company's total revenue for 2016 amounted to BGN 170 M (BGN 157.5 M over the same period of 2015). The revenue from construction over 2016 amounted to BGN 37.9 M (BGN 30.8 M over the same period of 2015). The breakdown of revenues by types of services is presented in Note 5 from the financial statement.

The cogeneration installation, commissioned at Kubratovo WWTP at the end of 2009, ensured as a priority the fulfillment of the plant's power supply needs in 2016.

The Company's operating costs over 2016 amounted to BGN 136.6 M (2015 – BGN 126.1 M). This amount includes BGN 37.9 M construction costs, which result from the application of IFRIC 12 and these costs offset the construction revenue above.

The depreciation and amortization costs over 2016 amounted to BGN 32 M. The value is higher than the one reported in 2015 (BGN 28.9 M), which is mainly due to the higher number of commissioned assets and the depreciation of the asset Concession Right until the end of the concession, whose period shortens each year.

The interest charges in the year are in line with the budgeted by the Company.

The net financial costs for the first six months of 2016 are by BGN 867 k lower than the ones reported over the same period of 2015, which is mainly due to the effect of the lower interest rates under the long-term financial liabilities of the Company and the reduced addition to the subordinated loan from 5.95% to 5.20%.

As result of the above factors, the profit after tax for 2016 was BGN 25.05 M as compared to BGN 22.5 M over the same period of 2015.

The management of the financial risk and the exposition of SV regarding the price, credit and liquidity risks and the risk of the cash flow are presented in detail in Note 24. Financial instruments to the separate financial statement

Signed significant deals:

Nº	Description	Contractor	Period of the contract	Starting date	Ending Date	Cost, w/out VAT

				71,117	71,407	71,118	71,313

Analysis of the relationship between the achieved financial results reflected in the financial statements for the financial year and the forecasts for these results published earlier:

Sofiyska Voda JSC has no published forecasts for the expected financial results in the year.

Analysis and assessment of the policy on financial resource management and specifying the capacity to service the liabilities, the possible threats and measures which the issuer, respectively the person under § 1e of the additional provisions of the Law on Public Offering of Securities, has applied or intends to apply in view of their elimination:

The financial statements as at 31.12.2016 was prepared on the basis of the assumption that the Company is a going concern and it will continue its activity in the foreseeable future.

As at December 31st, 2016 the current liabilities of the Company exceeded the current assets by 65,986 k BGN because the intragroup loan agreement (subordinated loan) ends in April 2017 and the obligations under the loan are presented as short-term liabilities.

The management of the Company is in the process of renegotiation of the subordinated loan with bank institutions and expects a positive result. The Company has the support of the Veolia Group, confirmed through the comfort letter issued on behalf of the Veolia Voda CEE, the sole owner of Veolia Voda (Sofia) B.V., the direct parent company of Sofiyska Voda JSC, which has expressed its intention not to require the repayment of the liabilities of Sofiyska Voda JSC to it or its subsidiaries within at least 12 months after the maturity date.

Due to that reason, the risk of non-repayment of the intragroup subordinated loan in case it becomes payable within the next financial year, which in its turn will result in a failure to comply with Loan A granted by an international financial institution, is considered low.

Throughout the year the Company continued to generate net income after taxes, which reached 25,051 k BGN in 2016 (2015: 22,469 k BGN). The cash and cash equivalents increased by 401 k BGN as compared to 2015 and they were 17,219 k BGN. Throughout the year the Company serviced on a regular basis its liabilities to suppliers, excluding the principal under the subordinated debt. There are no arrears to third parties.

In view of the above the management has the justified expectation to believe that the available capital resources and sources of funding (cash flows from the operational activity) will be enough to enable the Company to cover its liquidity needs within 2017.

Assessment of the capacity to implement the investment intentions and specifying the amount of the available resources and reflecting the possible changes in the funding structure for this activity:

The investment intentions of the Company are described in detail in the paragraph below for the Business Plan of the Company for the period 2017 – 2021. The implementation of the investment program in the Business Plan is fully funded with own resources, i.e. from the revenues of the Company generated from the foreseen prices for the provision of WSS services.

Information about changes that have occurred during the reported period in the main governance principles of the issuer and its business group:

No changes in the main governance principles of the issuer and its business group have occurred.

Information about the main characteristics of the internal control system and risk management system applied by the issuer, respectively the person under § 1e of the additional provisions of the Law on Public Offering of Securities, in the process of preparing the financial statements.

SV develops its internal control system based on best accounting practice and COSO model (COSO - Committee of Sponsoring Organizations of the Treadway Commission) The five components of internal control according to the model are:

- i. Control Environment
- ii. Risk Assessment (Process of Enterprise Risk Assessment)
- iii. Information and Communication (Information system, included the related to it business processes referring to financial reporting and communications)
- iv. Control Activities
- v. Monitoring (Ongoing monitoring of the controls)

These components are also set out in the International Standard on Auditing (ISA) 315, Appendix 1 – Internal Control Components.

The control environment sets the tone of an entity, influences the control consciousness of people within an organization and is the foundation for all other components of the internal control, providing discipline and structure. The factors of the control environment comprise: integrity and ethical values; employees' commitment to competence; management's philosophy and operating style; the way management assigns authority and responsibility, and organizes and develops its employees; as well as attention and guidelines, given by the Board of Directors.

Main policies and procedures ensuring the control environment are:

- Code of Ethics of Veolia Environnement (adopted by SV in June 2011)
- Ethics, Commitment and Responsibility of Veolia Environnement (adopted by SV in Oct 2012)
- Internal Code of Conduct
- Disclosure (Whistleblowing) Policy
- Hospitality Policy
- Conflicts of Interest Policy
- Anti-Fraud Policy, which is supported by
 - Fraud Investigation Procedure
 - Anti-Corruption telephone line (+359 2 8122 521, published on SV official web site www.sofiyaskavoda.bg)
- Accounting Policy
- Procedure on accounting closing
- Procedure on receiving and posting invoices to suppliers
- Policy for purchasing, stocktaking and writing off of assets etc.

SV like every entity faces a variety of risks from external and internal sources that must be assessed. A precondition to risk assessment is establishment of objectives, linked at different levels and internally consistent. Risk assessment is the identification and analysis of relevant risks to achievement of the objectives, forming a basis for determining how the risks should be managed. Because economic, industry, regulatory and operating conditions will continue to change, mechanisms are needed to identify and deal with the special risks associated with changes.

SV's risk management process in is regulated by a Risk Management Policy and supported by Business Risk Management Procedure, which describes the methodological approach at the identification, measuring, controlling and subsequent monitoring of these circumstances, event and actions that could impact the achievement of the business objectives of the company.

All personnel must receive a clear message from top management that control responsibilities must be taken seriously. They must understand their own role in the internal control system, as well as how individual activities relate to the work of others. They must have a means of communicating significant information upstream. Effective communication with external parties, e.g. customers, suppliers, regulators and shareholders should be in place.

SV's Communications Department focus on internal as well as external exchange of information with the stakeholders. In addition, SV's Regulation and Concession Compliance Department is in charge of

information exchange with the Municipality of Sofia, EWRC and other institutions. The relations with the customers are managed by the teams in "Customer Service" Directorate.

The intranet and the official website of the company are also a two-way channel for exchange of information both inside and outside the company.

Control activities are the policies and procedures that help ensure that management directives are carried out. They help ensure that necessary actions are taken to address risks related to achievement of the entity's objectives. Control activities occur throughout the organization, at all levels and in all units. They include a range of activities as approvals, authorizations, verifications, reconciliations, reviews of operating performance, security of assets and segregation of duties.

All effective policies, procedures and instructions on the specific work processes are published on SV's Intranet, which is accessible to all employees. The process of preparation of internal regulatory documents (policies, procedure, and instructions) is unified and described in an official internal procedure.

Monitoring – the internal control systems need to be monitored - a process that assesses the quality of the system's performance over time. This is accomplished through ongoing monitoring activities, separate evaluations or a combination of the two. Ongoing monitoring occurs in the course of operations. It includes regular management and supervisory activities, and other actions personnel take in performing their duties. The scope and frequency of separate evaluations depend primarily on an assessment of risks and the effectiveness of ongoing monitoring procedures.

The management is primarily responsible for the internal control system and the chief executive officer is assumed to be "owner" of the system. Management is accountable to the board of directors, which provides corporate governance, guidance and supervision.

The audit committee of Sofiyska Voda is created and operates (including by implementing its obligations for monitoring regarding financial reporting) under the Law for the Independent Financial Audit.

Internal auditors play an important role in evaluating the effectiveness of control systems, and contribute to ongoing effectiveness. Because of organizational position and authority in an entity, the internal audit unit often plays a significant monitoring role.

The weaknesses of internal control, identified during internal audits, inspections and monitoring are reported to the managers and the most serious matters are referred to the senior management and the Board of Directors.

Internal control is, to some degree, the responsibility of everyone in an organization and therefore should be stated in the requirements of everyone's job description. Virtually all employees produce information used in the internal control system or take other actions needed to effect control.

External parties also carry out monitoring over the activity of Sofiyska Voda and these are the regulatory bodies (Energy and Water Regulatory Commission), state institutions (tax authorities, ministries etc.) and external auditors.

In 2016 there are not known arrangements (including also after the closing of the fiscal year) as result of which in a future period changes could occur regarding the owned relative share of bonds or shares from current shareholders or bondholders.

Information about pending court, administrative or arbitration proceedings concerning liabilities or receivables of the issuer at the amount of at least 10% of its equity; if the total value of the liabilities or receivables of the issuer under all commenced proceedings exceeds 10% of its equity, information is provided for each individual procedure:

One of the most important pending cases of the Company is the lawsuit related to the penalty imposed by the Competition Protection Commission (CPC). With the ruling No. 370/19.03.2014, on the grounds of art.74, para.1, item 3 of the Competition Protection Act (CPA), the CPC claimed that Sofiyska Voda had committed an abuse of dominant position by charging default interest on debts based on estimated readings for a service used within the meaning of art. 21, item 1 of the CPA. The

imposed penalty is 4,800 k BGN and it was calculated on the basis of 0.5% of the Company's income in 2013 as a debt ratio 8 was applied as well. The Company took actions to appeal the imposed penalty in compliance with the applicable legislation.

On 11.01.2016 the SAC approved partially the appeal of Sofiyska Voda against the decision of the CPC and decreased the amount of the imposed penalty from 4,800 k BGN to 2,400 k BGN. The decision was appealed before a 5-member jury of the SAC both by Sofiyska Voda and the CPC. Regarding the appeals filed by both parties, the lawsuit No. 3161/2016 was initiated, as the hearing was scheduled for April 7th, 2016. The court decision is expected.

Risks and uncertainties:

One of the main risks, which the Company is exposed to, is the possible payment of the penalty imposed by the CPC. With the ruling No. 370/19.03.2014, on the grounds of art.74, para.1, item 3 of the Competition Protection Act (CPA), the CPC claimed that Sofiyska Voda had committed an abuse of dominant position by charging default interest on debts based on estimated readings for a service used within the meaning of art. 21, item 1 of the CPA. The imposed penalty is 4,800 k BGN and it was calculated on the basis of 0.5% of the Company's income in 2013 as a debt ratio 8 was applied as well. The Company took actions to appeal the imposed penalty in compliance with the applicable legislation. On 11.01.2016 the SAC approved partially the appeal of Sofiyska Voda against the decision of the CPC and decreased the amount of the imposed penalty from 4,800 k BGN to 2,400 k BGN. The decision was appealed before a 5-member jury of the SAC both by Sofiyska Voda and the CPC. Regarding the appeals filed by both parties, the lawsuit No. 3161/2016 was initiated, as the hearing was scheduled for April 7th, 2016. The court decision is expected.

Another main risk for 2017 concerns the possible lack of approval of the price foreseen in the Business Plan 2017 – 2021. The effect of no approved prices of the WSS services from the beginning of 2017 in line with the submitted Business Plan will result in a decrease in the annual revenue from WSS services in 2017 by 18,756 k BGN and decrease in the receivables from WSS services without VAT by 17,785 k BGN (VAT excluded). This will lead to reconsideration and possible decrease in the investment program for 2017 set out in the Business Plan.

Renegotiation of the concession agreement:

With an order by the Mayor of Sofia dated 29.03.2016 a new working group was set up by representatives from Sofia municipality and external experts with the task to continue the renegotiations of the Concession Agreement. The first official meeting was held on 29.07.2016.

The meetings continued during the year with regard to the renegotiation of the Concession Agreement, which was also discussed in the context of the draft Business Plan 2017-2021 developed by the Company and its main parameters like operating costs, amount of the investment program, levels of the KPIs for the WSS services, possible refinancing of the subordinated debt, etc. As at the end of 31.12.2016 the renegotiation process was not finalized due to its complexity and the necessity for the Company to have an approved Business Plan for the period 2017-2021.

General Assembly:

On 19 January 2016 an extraordinary General Assembly of the shareholders of Sofiyska Voda was held. During the General Assembly the following decisions were taken:

1.1 The following members from the Board of Directors of Sofiyska Voda JSC were released:

1. Mr. Bruno Daniel Paul Roche;
2. Mr. Gyorgy Palko;
3. Mr. Stefan Nikolov Peltekov;
4. Mr. Tsvetan Dobrev Gergov;

1.2. The following people were selected as members of the Board of Directors of Sofiyska Voda JSC:

1. Mr. Arnaud Philippe François Valleteau de Moulliac;
2. Mr. Frederic Laurent Faroche;

3. Mrs. Milena Stajkova Tsenova;
4. Mr. Biser Nikolaev Damyanovski;

2.1 The withdrawal of Mr. Pierre Emmanuel De Cibeins from the Audit Committee of Sofiyska Voda was approved;

2.2. Mr. Fabien Ferrer was appointed as a member of the Audit Committee of Sofiyska Voda JSC.

2.3. Remuneration was fixed for the Audit Committee members elected as per the proposal of the shareholder Vodosnabdyavane i Kanalizatsia EAD, as follows: for the Chair Mr. Ivan Iliev – at the amount of four minimum monthly salaries for the country, and for the AC member Mr. Petyo Ignatov - at the amount of three minimum monthly salaries for the country.

On June 10th, 2016 the annual General Shareholders Meeting of Sofiyska Voda JSC was held. The following decisions were made at the General Meeting:

1. The consolidated report on the activity of Sofiyska Voda JSC for 2015 and the consolidated annual financial statements of the Company for 2015 were approved;
2. The report on the activity of Sofiyska Voda JSC for 2015 and the individual annual financial statements of the Company for 2015 were approved;
3. The report on the activity of the Audit Committee of Sofiyska Voda for 2015 was approved;
4. The profit of Sofiyska Voda for 2015 would not be distributed and no dividends would be paid to the shareholders for 2015 in view of the provisions of the Loan Agreement between the Company and the EBRD;
5. Sofiyska Voda's Board Members were relieved of liability for their activity in 2015.

Within the statutory deadline the Company disclosed the individual and consolidated financial statements and reports on the activity under its file in the Trade Register with the Registry Agency.

On December 13th, 2016 an extraordinary General Shareholders Meeting of Sofiyska Voda was held. The following decision was made at it:

1. KPMG Bulgaria Ltd., UIC 040595851, registered under No.45 in the Institute of the Chartered accountants, was appointed as the auditor to verify and certify the individual and consolidated statements of Sofiyska Voda for the financial year 2016.

Board of Directors

On 19 January 2016 was held an extraordinary General Assembly of the shareholders, at which were released the following members from the Board of Directors: Mr. Bruno Daniel Paul Roche, Mr. Gyorgy Palko, Mr. Stefan Nikolov Peltekov and Mr. Tsvetan Dobrev Gergov and selected as their replacements: Mr. Arnaud Philippe François Valleteau de Moulliac, Mr. Frederic Laurent Faroche, Mrs. Milena Stajkova Tsenova and Mr. Biser Nikolaev Damyanovski. Until the end of 2016 changes were not been made in the Board of Directors of SV. The Board of Directors of SV consists of 7 members: Mr. Arnaud Philippe François Valleteau de Moulliac, Mr. Frederic Laurent Faroche; Mrs. Mariana Georgieva Iteva, Mr. Ferenc Szucs, Mrs. Milena Stajkova Tsenova, Mr. Vladimir Georgiev Stratiev and Mr. Biser Nikolaev Damyanovski. The company is managed and represented individually by Mr. Arnaud Philippe François Valleteau de Moulliac and Mr. Frederic Laurent Faroche.

The remunerations of the Board Members are:

<i>In k BGN</i>	2016	2015
Remunerations of the Executive Director and the Board of Directors	212	329
From which under the balance as at 31 December	8	8

The Board members do not hold, have not acquired and transferred shares and bonds of the Company during the year.

The Board Members have no rights to acquire shares in the Company.

In 2016 the Board Members participated in the management of other companies registered in the Trade Register with the Registry Agency or entities, or commercial proxies, managers or board members of companies registered in the Trade Register with the Registry Agency, or participated as partners with unlimited liability, or held more than 25% of the capital of another entity, as follows:

1. Frederic Laurent Faroche – participated in the management of: VEOLIA ENERGY SOLUTIONS BULGARIA, UIC: 130547859; Veolia Energy Bulgaria EAD, UIC: 121371700; VEOLIA ENERGY VARNA EAD, UIC 103195446;
2. Marian Georgieva Iteva – participated in the management of: Veolia Voda Bulgaria EOOD, UIC: 201404389; held more than 25% of the capital of MI CONSULT INTERNATIONAL EOOD, UIC: 200981719.
3. Bisser Nikolaev Damyanovski – participated in the management of and held more than 25% of the capital of INTERTRADE CONSULT EOOD, UIC: 201824172

The Board Members did not signed contracts under art.240b of the Commerce Act during the year.

Acquired and transferred shares:

In 2016 the Company did not acquire or transfer own shares.

Research and development

SV does not carry out research and development.

Business Plan:

With its decision № БП-28 dated 12.02.2016 the Energy and Water Regulatory Commission (EWRC) approved Business Plan 2016.

With Decision № И-8 dated 28.04.2016 the EWRC approved the new prices of the WSS services provided by the company, where the total increase of the combined price (supply, sewerage, treatment) is 5 stotinki (0.05 BGN) without VAT

With decision dated 13 January 2016 the Council of Ministers approved an Ordinance on the regulations of the quality of the WSS services and an Ordinance on the regulation of the prices of the WSS services, which were the basis for the preparation of Business Plan 2017-2021.

The preparation of the Business Plan 2017-2021 has been significantly delayed by the EWRC in terms of the submission of the necessary instructions for application of the ordinances and the provision of a final electronic model for the preparation of the document.

Sofiyska Voda started preparing the Business Plan 2017-2021, based on the current legislation and in accordance with the Ordinance on regulating the quality of water supply and sewerage services, the Ordinance on regulating the prices of the water supply and sewerage services and the instructions for their application. When preparing the business plan of the company, the fact that Sofiyska Voda operates as the only public-private partnership in the WSS sector in Bulgaria is taken into account. For this reason, in the preparation and implementation of the business plan, the company should be guided not only by the requirements of the legislation, but also the need to take into consideration the contractual obligations of the company set in the Concession Agreement.

Sofiyska Voda submitted its draft Business Plan 2017-2021 to MoS and the Regulator on 30.06.2016 in compliance with the legal set period. After the submission of the strategic document, the efforts of the company were aimed at cooperation with the Regulator and the MoS regarding the analysis and the approval of the BP.

Following the submission of the Business plan, the EWRC requested on a couple of occasions further information and clarifications in connection with the BP. The Company took into account the further recommendations made by the Commission and they were reflected in the final version of the Business plan submitted to the EWRC and the MoS on 04.01.2017.

SV developed the investment program for the regulatory period 2017-2021 on the basis of:

- The maintenance of high H&S standards at work and ensuring an optimal working environment for the Company employees;
- The commitment for an indicative amount of the investments till the end of the Concession Term (in connection with the memorandum under ISPA signed between the Ministry of Environment and Water and the European Commission);
- The commitment for additional investments under the Settlement Agreement between the MoS and SV dated 2009 and for compensating considerations:
- The long-term financial estimates of the company
- The new legislation for regulation of the WSS services and the instructions to them.
- Corporate Accounting Policy

The content of the investment program was planned by taking into account:

- The necessity of providing WSS services with sustainable high quality to an increasing number of residents of MoS;
- Necessity of achieving the agreed with EWRC individual and long-term KPIs for the activity of the company;
- The requirements of the normative regulations in the area of the WSS services, construction, energy efficiency, occupational safety and environmental protection;
- Necessity for continuous modernization of the facilities and optimization of the working processes in order to improve the effectiveness and ensure occupational health and safety;
- The forecasts for the development of the WSS systems in Detailed Urban Development Plan of Sofia, Strategy for the Development of the Technical Infrastructure of MoS as well as the investment priorities of the Grantor in relation to the sewerage network.

The breakdown of the total investments of the Company for the period 2017-2021 is given in the table below:

	2017 (k BGN)	2018 (k BGN)	2019 (k BGN)	2020 (k BGN)	2021 (k BGN.)
Investments in regulated services	44 163	44 435	38 684	33 779	32 982
Non-regulated investments	1 748	2 712	1 304	1 248	1 196
Additional investments	2 368	1 660	760	1 060	1 060
Total investments:	48 279	48 807	40 748	36 087	35 238

The total amount of the financial resources envisaged for investments in the period amount to **209.16 M BGN**, and the average annual amount of the investments is **41.83 M BGN**. In view of reaching quicker the target levels of the KPIs and enhancing the work efficiency, the Company has envisaged a higher amount of investments in the first two years of the period (46.4% of the total investments for the period).

In compliance with the new regulatory framework, the EWRC determined (following a discussion with the WSS operator) the individual levels, which should be achieved by every WSS operator till the end of the regulatory period. Such levels were determined for Sofiyska Voda as well. The Company structured and planned its future projects and activity in a way allowing the achievement of the levels of the KPIs for the WSS services determined by the EWRC.

We think that in this rapidly changing and unstable regulatory framework, Sofiyska Voda has prepared a realistic and balanced business plan for the period 2017 – 2021, envisioning an ambitious investment program (BGN 209.16 million) and the achievement of the levels of key performance indicators for water supply and sewerage services determined by the EWRC.

Sofiyska Voda JSC believes that the open and expert discussion on the key assumptions in the Business Plan with the main stakeholders – the MoS, the EWRC and society lead to better clarity in terms of the long-term plans of the Company and the possibilities of ensuring a stable financial

framework in the new regulatory period, which will secure the implementation of the Business Plan of the Company.

Events following the balance sheet date:

On 10 January 2017 an annex was signed to contract for subordinated loan between Sofiyska Voda JSC and the shareholder and creditor of the company Veolia Voda Sofia B.V. The aim of the annex is reduction of the amount of the addition from 5.95% to 5.20% backdated from 05 October 2016. The correction of the reduced addition is registered as at the date of the financial report of the company 31 December 2016.

Customer Service

The main event related to the Customer Services in the first half of 2016 is the project for ISO 9001:2015 certification of the customer related processes. Sofiyska Voda has implemented a quality management system compliant to the new standard's requirements, based on the principles of process approach, risk based thinking and continuous improvement. The project has been the follow-up of the previous implementation of the new customer information system, which already structured and simplified the processes, as well as provided the necessary tools for monitoring the performance of processes included in the scope of certification: management of customer accounts, meter management and meter reading, billing, payments and debt collection, management of customer interactions. The certification audit which took place in June 2016 was successfully passed and Sofiyska Voda became the first utility company in Bulgaria to certify its customer service processes under the new version of the standard ISO 9001:2015.

Relations with customers

In the reporting period of 2016, 374,402 incoming calls were registered in the Call Center, which is a drop by -26% compared to the same period in 2015 and by-18% compared with the same period in 2014. The fewer number of incoming calls is a proof of improvement in the quality of service, since the customers have fewer inquires and complaints about our services. The share of complaints from all received calls is 14.1% for the reporting period of 2016. In 2016 a new key performance indicator was introduced: % of calls answered in less than 30 seconds, which was 86% for the period January – December from the calendar 2016. The rate of the not received calls was below the targeted 4% since March 2016, and the registered values were between 2.97% in March and 1.11% in December.

Customer Service Centers

In 2016, Sofiyska Voda maintained its network of 8 Customer Service Centers, located in various parts of the city. The total number of visits received in this period was 169, 411 nos, which is by -7.9% fewer than the same period of the previous year. The number of payments received in the centers also decreased by -5.9% (115,148 over the reporting period of 2016 compared to 122,399 in 2015), due to several alternatives for payment.

Internet services

In January – December 2016, there were 1 844 667 registered visits to the Company's website. 74,895 water meter self-readings were submitted by our customers, as for the same period of 2015 they were 53, 423.

The enquiries received through the website were 8,043 and 7,337 of them required an answer. All answers were sent within 24 hours from receipt of the enquiry.

In January – December 2016, 20,515 customers cancelled their paper invoices. At the end of December 2016, a total of 70,295 customers received electronic invoices.

Water meter services, billing and debt collection

Replacing water meters

Replacing water meters on WSCs

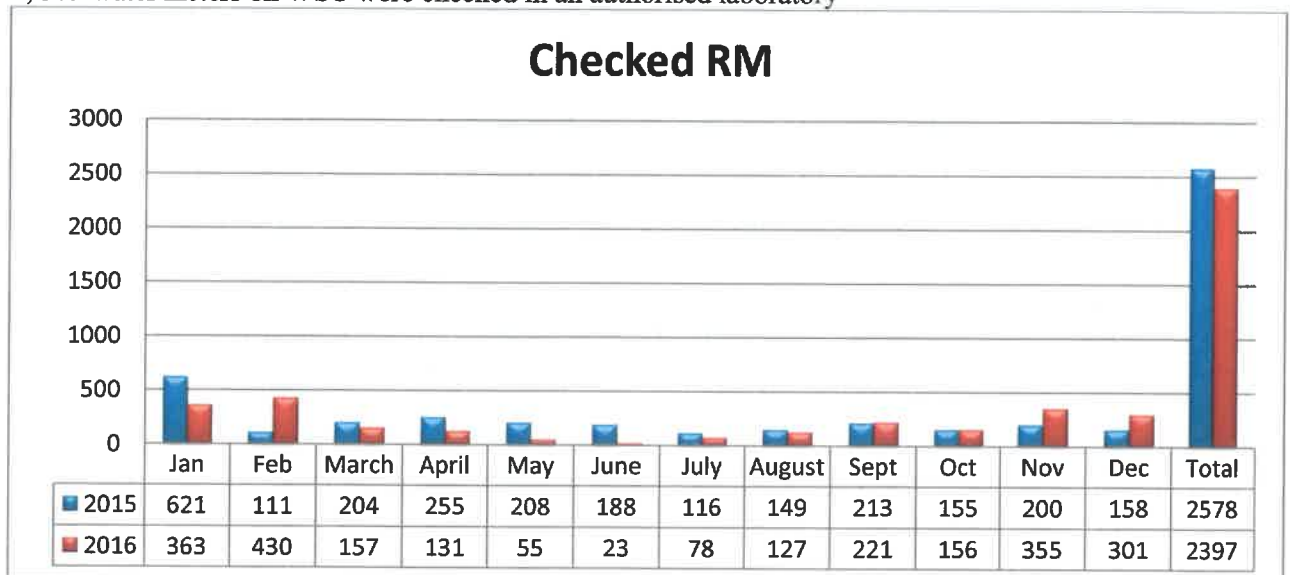

- For the period January 2016 – December 2016;
- The number of water meters set into metrological validity by teams of the company is 14,117.

In addition, 752 water meters on water service connections were replaced by the customers and sealed by Illegal Connections team – these are water meters, which were frozen, broken or the customer prefers not to pay for the replacement and install directly a new device, which meets the normative, technical and metrological requirements.

Or the total number of the water meters set into metrological validity in 2016 is 14, 869.

- 2, 379 water meters on WSC were checked in an authorised laboratory

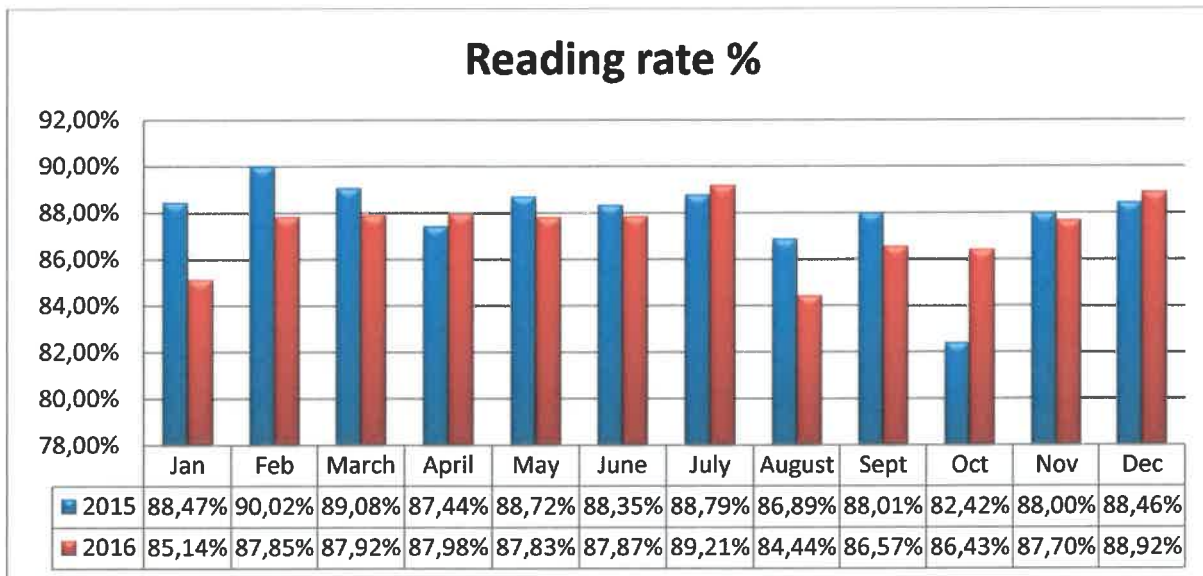

The challenges regarding the performance of the activities are related to the lack of contract or expired contracts for:

- Delivery of water meters
- Check on water meters in authorized laboratories.

This has an effect on the necessary regular deliveries and on the goals set for achievement for 2016.

Meter reading

Since the middle of June the meter reading process is almost entirely automated. The abandoning of the hard copies of invoices and termination of manual data entry related to water meters, customers and properties is about to be completed.

The total success rate regarding the performance of the water meter reading activity for 2016 is 87.32%.

Billing

In 2016 the company registered an increase by 0.6% in the billed volumes of potable water on an annual base, compared to 2015.

The total sum billed of amounts for the same period were BGN 149.55 M, which is by +2.8% more compared to 2015 (BGN 145.51 M). The higher percent of increase of the total billed value compared to the billed water volumes is due to the increased combined price for the service (potable water supply, sewerage and wastewater treatment) by 3.4% valid as of 01.05.2016.

Debt Collection

In 2016, the Company continued the successful implementation of the strategy for increase of debt collection from its customers. As a result, the total collected amount at the end of the year is BGN 142.56 M as compared to BGN 137.46 M in 2015 or the registered increase was 3.7% on an annual basis. Also the annual coefficient of debt collection for 2016 is 95.34%, by 0.92% higher compared to 2015.

Over the reporting period is registered also considerable increase in the result and the activities of the internal teams for debt collection. The total number of performed phone calls shows an increase of 34,497 calls (11.7%) and the total collected sum as result of this activity by BGN 1.11 M more compared to 2015. (BGN 11.40 M in 2016 and BGN 10.29 M in 2015). The teams visiting and negotiating at the address of the customer realized respectively higher debt collection by 9.11% (14.98% in 2016 compared to 13.72% in 2015) and billed more than 61 k BGN more compared to the same period of the previous year (588 k BGN in 2016 and 526 k BGN in 2015).

For the purpose of continuous improving and increasing of the quality of the supplied services and customer satisfaction the company continued to develop its payment channel, through which the

customers could pay their debts, as well as to propose flexible deferred payment agreement to the customers with temporary financial difficulties.

Non-regulated business

SV continues to develop its activities of providing additional services to its customers – installing, testing and sealing individual meters, as well as small plumbing services. As at December 2016 the activity is being implemented within the estimates.

OPERATIONS AND MAINTENANCE

Water Resource Management

The continuous monitoring of water volumes supplied to the Concession Area is the basis for the water management, implemented by SV.

Total water volume abstracted from all potable water sources over the period January – December 2016 is 161,034,786 m³

The data from the monitoring showed that the Company has achieved an actual decrease in the water volumes used for water supply to the Concession Area.

The raw water abstracted from all water sources over the period January-December 2016 compared to the same period of 2015 decreased by – 5,994,298 m³

Consumption trends

In 2016, the billed volumes of the company increased by 1.12% compared to 2015 or 1,024 million m³

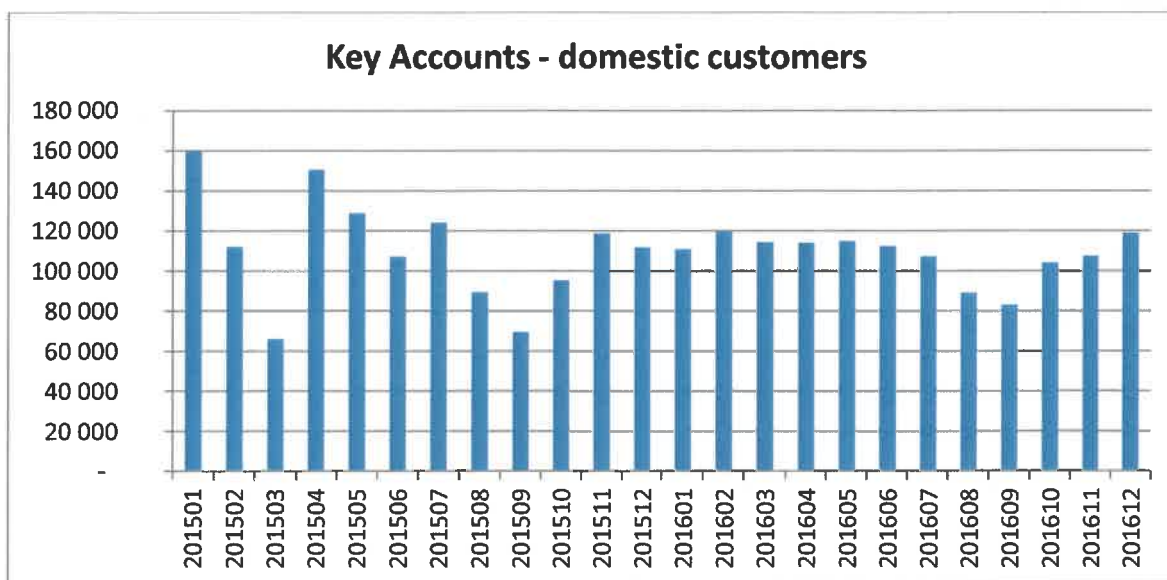

The table below presents the consumption trend evolution by types of customers and types of water supplied (potable, non-potable and supplied raw water):

Water	2015, m ³	2016 m ³	Annual Diff (m ³)	Annual Diff (%)
Households	61 086 283	61 272 664	186 381	0.31%
Budget customers	4 511 538	4 605 925	94 387	2.09%
Commercial customers	13 836 300	14 034 489	198 189	1.43%
<i>Non-potable water</i>	4 449 349	4 605 372	156 023	3.51%
<i>Raw water (Samokov and Bozhurishte)</i>	7 427 742	7 817 128	389 386	5.24%
Total potable water WS Sofia	79 434 121	79 913 078	478 957	0.60%
Total billed water for all water systems	91 311 212	92 335 578	1 024 366	1.12%

The considerable % of increase in the raw water is due to the fact that in September 2015 a new consumer was connected – the villages of Gorni and Dolni Okol, which is billed during the entire 2016. The increase by 1.43% in the billed volumes of commercial customers is due to the increased production of these customers.

The tables below show the monthly consumption by type of key customers for the period 2015-2016.

For the period January-December 2016 the billed volume is by 38,019 m³ less for the key account of the **population** type as opposed to 2015. The monthly levels are indicated in the following graph:

The table below shows 7 customers who form 55% of the mentioned decrease. These are the students' hostels and their consumption is determined by the different number of students. For one of the residential buildings in 2016 a rule was introduced according to which the students pay for part of the consumed water volumes which leads to a decrease of the consumed and respectively the billed water volumes.

Customer number	Customer	Cause for the decreased consumption	Region MoS	Total 2015, m ³	Total 2016, m ³	Annual change, m ³	Annual change, %
1001001960	Block 41	The consumption rate depends on the different number of residing students.	Studentski	22 465	18 135	-4 330	-19.27%
1001003298	Block 50	The consumption rate depends on the different number of residing students.	Studentski	22 668	19 176	-3 492	-15.40%
1001001931	Block 50	The consumption rate depends on the different number of residing students.	Studentski	10 459	7 729	-2 730	-26.10%

1001001922	Block 34	In 2016 the students pay part of the consumed water and they economize it.	Studentski	8 779	6 080	-2 699	-30.74%
1001001912	Block 22	The consumption rate depends on the different number of residing students.	Studentski	11 157	8 464	-2 693	-24.14%
1005059727	Block 12	The consumption rate depends on the different number of residing students.	Studentski	20 172	17 572	-2 600	-12.89%
1001001943	Block 59	The consumption rate depends on the different number of residing students.	Studentski	17 868	15 681	-2 187	-12.24%
TOTAL				113 568	92 837	-20 731	-18.25%

For the entire 2016 the billed volume of the key customers of the budget type has reported an increase by 87,947 m³, or by 2% more as opposed to 2015. Detailed information on the monthly levels is presented in the following graph:

The billed volume of one customer in 2016 is by 177,777 m³ more – Sofia Prison. The main reason for this is that in 2015 the customer submitted self-readings which were lower. The following graph shows the dynamics of the billed volumes for 2015 and 2016 by months for this budget customer:

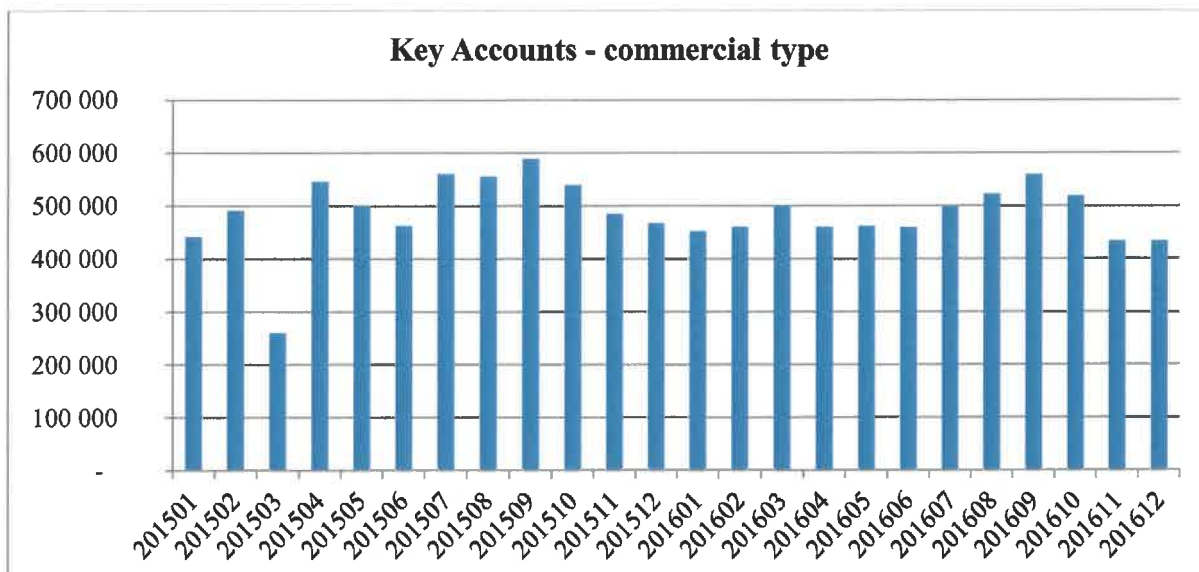

The increase of 177,777 m³ of the stated budget customer compensates to a large extent the registered fluctuation (increase or decrease) in the billed consumption of the budget key customers in 2015 and 2016. The next table shows budget customers with more significant differences in the consumption rate:

Customer number	Customer	Region MoS	Total 2015, m ³	Total 2016, m ³	Annual change m ³	Annual change, %
1001044093	SOFIA JAIL	SERDIKA	125924	303701	177 777	141.18%

100100297 2	TRAFFIC POLICE – TECHNICAL INSPECTIONS	IZGREV	24084	14663	-9 421	-39.12%
TOTAL			617 423	710 984	93 561	15.15%

For the period January – December 2016 it is by 139,091 m³ less than the billed volume of potable water of the key customers of the commercial type as opposed to 2015. The evolution in the monthly billed volumes of these customers is presented in the graph below:

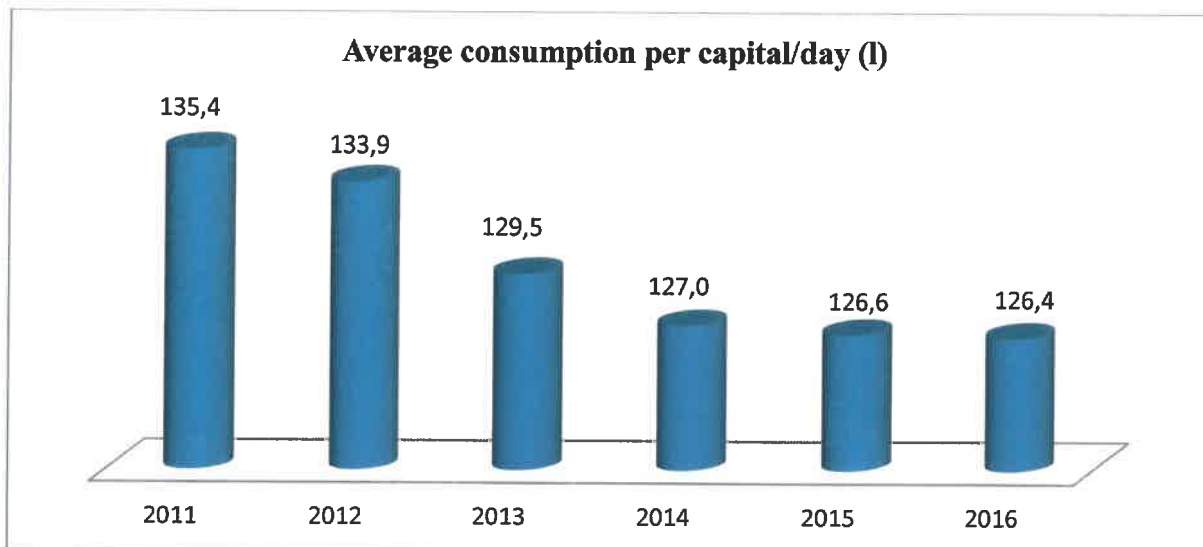

35% of the total decrease of the billed consumption of potable water for the commercial customers for 2016 is formed by 1 customer – Družba Staklarski Zavodi AD. In 2016 most of the machines of this customer operate with non-potable water and this is the reason why the consumption of potable water decreases by 48,803 m³, or by 33% as opposed to the billed consumption in 2015. The detailed information by months for the billed consumption for 2015 and 2016 of the mentioned customer is presented in the following table:

Consumption of domestic customers – analysis of the current trends

In 2015 the consumption of domestic customers is 77% from the total billed volume. In 2016 there is no considerable increase in the percent as the consumption of the domestic customers reached 77% and the one of commercial customers is 17% from the billed volumes.

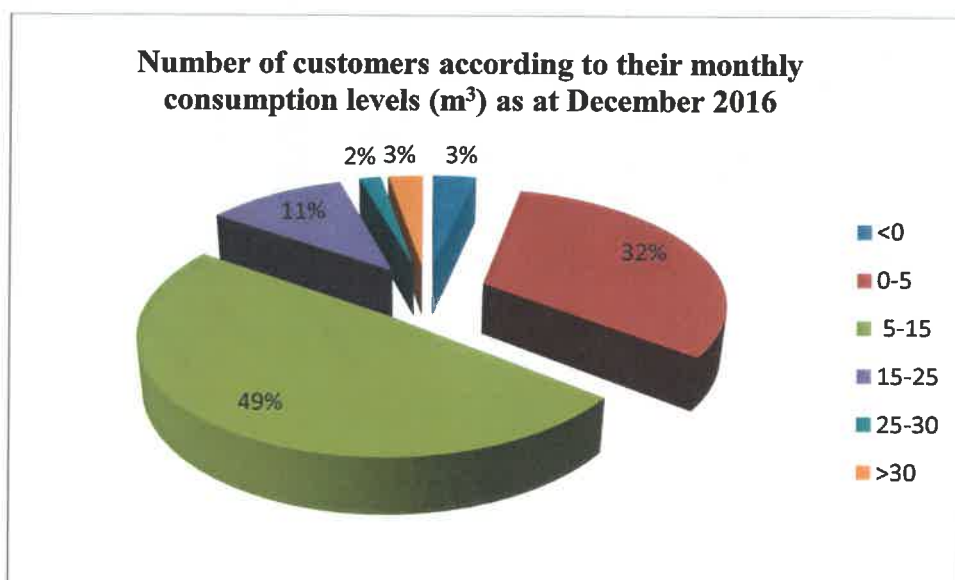

The reducing trend in the consumption of domestic customers might be seen in the daily consumption per capita in the chart below

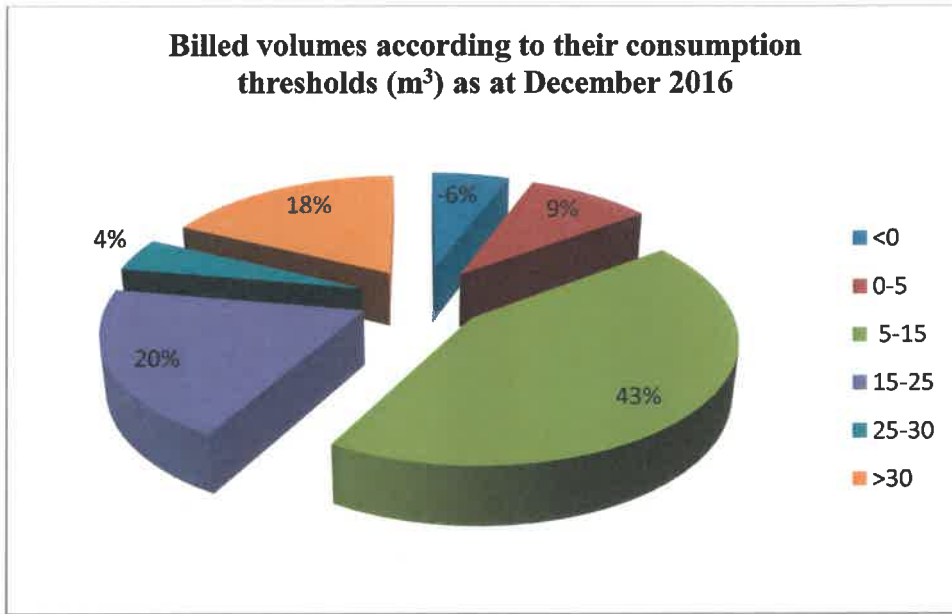

The average daily consumption is calculated as a ratio between the billed annual volume for these customers, the number of the population in Sofia city (estimate for 2016 of the National Statistical Institute) and 365 days

This trend is related also to the dynamics of the customers from groups with higher water consumption to such with lower water consumption. On a monthly basis the company monitors the number of the domestic customers, whose water consumption is measured by the following monthly consumption: 0-5 m³, 5-15 m³, 15-25 m³, 25-30 m³, exceeding 30 m³/month.

In 2016, 32% of the customers with measured consumption consumed between 0-5 m³/month, 49% between 5-15 m³/month and 11% between 15-25 m³/month.

The breakdown of the billed volumes by consumption levels is presented on the following chart:

Reducing unaccounted-for water

Over the period January – December 2016 were achieved the following results:

Total abstracted water; reduction by 6.0 mln. m³ (reduction by 3.59%);

Inlet WS Sofia: reduction by 5.7 mln m³ (reduction by 3.57%);

- *Billed water volumes Q3: increase by 0.48 mln. m3 (increase by 0.6%)*

Unaccounted-for water Q9: reduction by 6.1 mln. m3 (reduction by 7.78%);

Specific losses: average reduction by 5.1 m³/day/km of network (reduction by 7.98%)

Total assigned leaks: reduction by 477 nos. (reduction by 6.71%)

Quality of the supplied water

With implementation of the monitoring program for potable water quality in the period January-December 2016 the percentage compliance of the samples taken from the points of the water supply system is 99.90% by physical and chemical indicators and 99.88% by microbiological indicators, thus the trends from 2015 have continued. The reported levels of compliance of potable water quality fully meet the requirements of the Ordinance on the long-term levels of the KPIs for WSS services (98% for physical and chemical indicators and 99% compliance for microbiological indicators).

Laboratory testing Complex

The Laboratory Testing Complex (LTC) of SV implements the Company's plans for monitoring surface and potable water, wastewater and sludge in terms of taking samples from water and sludge and analyzing the microbiological, physical and chemical, and hydro biological parameters.

The activities executed by the LTC over the reporting period are connected mainly to the implementation of the plans for monitoring of potable water, surface water and groundwater, as well as of wastewater and sludge; the keeping of the accreditation; the control over the processes, ensuring traceability and transparency of the executed activities, the provision of confidentiality regarding the analytical results from the samples of the LTC customers LTC and marketing of the laboratory services.

In February 2016, the LTC passed successful evaluation, implemented by Executive Agency "Bulgarian Accreditation Service" by which was expanded the scope of the accreditation by about 80%. The expansion includes both new methods and new matrices – table, spring and mineral water and sludge from WWTP. The expanded scope of the LTC accreditation was officially confirmed by the new certificate, issued in May 2016

In 2016 in sector *Potable Waters* of LTC a total of 8,500 samples were received and 140,000 analyses were conducted on them, and in sector *Wastewater* respectively 10,000 samples for a total of 88 000 analyses.

In 2016, the LTC continued servicing successfully its contracts for provision of laboratory services to external customers, under which revenues were realized, and service level agreements with internal customers. There have not been claims made against the laboratory services on behalf of the customers.

The LTC was provided the opportunity to participate in 17 international programs for proficiency testing, including 154 methods. The result of the LTC was more than 90% success rate. The participation in these programs ensures an independent assessment of the performance of the laboratory and provides an opportunity to compare its efficiency with other equivalent laboratories frequently world-wide. This participation provides feedback for the quality of the tests and allows the laboratory to find the spheres of improvement in order to acquire more accurate control on the processes and demonstrate competence before customers, the accreditation authorities and other regulatory bodies.

The LTC was successfully audited for the second time on July 7-8th, 2016 by the Executive Agency 'Bulgarian Accreditation Service'. The microbiological methods for the potable water were monitored and assessed. Non-compliances were not found.

Each sample received by LTC is given a unique identification number and then registered in the laboratory information management system with controlled levels of access to the information. This ensures anonymity, confidentiality and reliability in terms of the results of the samples analyzed upon requests of the internal and external customers.

Water Network Management

The focus of the Company in 2016, like in 2015, was on several main aspects:

- Improving operational customer service, mainly by reducing the response time in case of disruptions in the normal functioning of the water supply network and improving the information which the Company provides to its customers regarding the occurred or future operational events through the Information Centre, in which the zones affected by the emergency and planned water supply interruptions are visualized, and through the SMS-notification service for the upcoming planned water supply interruptions.
- Enhanced control and speeding up the reinstatement works after the completion of the civil works.
- Increasing the number of planned water supply interruptions for network reconstructions, which allows for preliminary information and reduction of the inconvenience for the customers.
- Improving the interaction among the departments involved in the operational activity and optimizing the information flows within the Company concerning current or planned operational events.

As result of the taken measures there was a significant drop in the number of failures of the water supply network compared to the same period in 2015

The first mobile software in Sofiyska Voda was launched in December with regard to the improvement of the operational customer service. The software is a mobile version of Pegasus application, which is used for management of the signals, related to the operations and maintenance of the water supply and sewer network. The mobile software is used by 60 users from different teams of the Company and allows the receiving of signals, as well as the processing and reading of a sequence of stages of the work processes by the employees on field. The software provides options to work with maps and files, as well as to control the entered information and the assignment of repairs by the validation at key stages of the processes. It is expected to achieve promptness and accuracy of the servicing of the signals, related to the management of the WSS network and enhancement of customer satisfaction. Last, but not least the mobile software will help with the implementation of one of the objectives of the company for environmental protection – reduction of the consumption of paper and printing of documents.

Sewerage

In 2016, we continued the implementation of the program for proactive maintenance of the sewerage network, as result of which over the period proactively cleaned more than 56 km of the network within the Concession Area.

At the beginning of 2016 to Sewerage Service Dept. was created a team for survey of big sewers on the territory of the concession area. The setting up of the team became possible thanks to the achievement of operational efficiency in other activities and the provision of the necessary human resources. At present, the team consists of four field specialist and a team lead that launched a new activity of the company. Since the setting up of the team until the end of 2016 more than 60 kilometers of trunk sewers were surveyed. The activity is related to the detection of a number of ‘invisible’ current problems along the sewage facilities, whose repair is crucial for the future operation of the facilities.

Wastewater treatment

Over the period January – December 2016, Kubratovo Wastewater Treatment Plant (WWTP) treated a total of 133.7 M m³ of wastewater from the sewerage network of the MoS.

The Wastewater Unit of the Laboratory Testing Complex at Kubratovo WWTP conducts continuous monitoring of the quality indicators of treated wastewater and sludge generated in the treatment process.

Quality of treated wastewater

Under a permit for discharge of wastewater the main indicators are analyzed - biological oxygen demand (BOD₅), chemical oxygen demand (COD) and suspended solids (SS), total nitrogen, total phosphorus and all other indicators specified in the discharge permit for treated wastewater at the outlet of WWTP

In 2016 was taken the statutory number of samples regarding the listed above quality indicators of the treated wastewater.

The values of the quality indicators of the samples are below the levels, determined in the permit for discharge of wastewater

Sludge stabilization and utilization

The sludge generated through wastewater treatment is stabilized in four anaerobic digesters. The sludge treated in the digesters is mechanically dewatered to produce a ‘sludge cake’ with dry matter content of about 25%.

Over the period were stabilized more than 154,875 tons of sludge by the treatment processes and at present in agriculture were utilized more than 77 432 tons.

The control on waste produced in WWTP Kubratovo, including the dewatered sludge, is exercised in accordance with the requirements of the Waste Management Act. SV draws up and submits the reports required to the Ministry of Environment and Water

INVESTMENTS JANUARY-DECEMBER 2016

With Decision БП-28 dated 12.02.2016 the EWRC approved Business Plan 2016 with a total annual financial amount of the investment program BGN 60.5 M. It should be pointed out that the investment opportunities of the company regarding the amount of the investments depend directly on the level of the tariff of the supplied WSS services. The cited financial estimates for 2016 were forecasted upon the assumption that the price of the provided combined WSS services will be 1.76 BGN/ m3 (without VAT), valid as of 01.02.2016 – something which in fact did not happen.

With decision No И-8 dated 28.04.2016 EWRC approved combined price of the WSS services from 1.52 BGN/ m3 (without VAT) valid as of 01.05.2016 i.e. by 0.24 BGN m3 lower than the initially set. It impacted the estimates for the amount of the investments program and the analyses of the company showed that the financial opportunities of the company require the total investment program to be updated to the amount of about BGN 48.7 M

In 2016, the company implemented investments amounting to BGN 42.5 M, which is 87% of the updated annual plan.

ENVIRONMENTAL PROTECTION AND SUSTAINABLE DEVELOPMENT

SV has a certified Environmental Management System in compliance with the requirements of the international standard ISO 14001:2004 dated 2008. In 2016 the maintenance of the system continued by improving the EMS documentation and conducting internal regular inspections in line with the approved annual schedule.

In connection with the introduction of a Quality Management System (QMS) in compliance with the requirements of international standard ISO 9001 regarding customer service process and the integration of the Occupational Health and Safety Management System (OHSMS) and the Environmental Management System (EMS), a new integrated policy was created. Consequently 5 main procedures were updated for the purpose of the proper functioning of the integrated management systems.

In July and November 2016 two combined internal audits were conducted of the EMS and OHSAS. 10 audit teams were set up, and within 3 days they held audits on a process principle covering key processes in the Company. Reports were issued and submitted to the management of the Company.

At the beginning of December 2016 the Company was audited under the EMS by a third independent party – a certifying authority. The audit was concluded with 3 recommendations made for improvement, concerning the EMS, as effective functioning of the system was reported.

Environmental incidents

In 2016, 7 cases of sudden pollution at the inlet of Kubratovo WWTP were registered as well as 4 incidents with leakage of fuel and lubricants. The respective procedural measures were taken in due time in order to eliminate the incidents.

Program for achieving the environmental protection goals

The environmental protection goals of the Company are related to introducing best practices of energy efficiency upon operation and maintenance of the water supply and sewerage network, decrease in the

water losses along the network, ensuring more and more efficient and high-quality treatment of wastewater by reducing at the same time the use of chemicals and reagents and transferring waste into raw material for production of energy.

Training and initiatives

Under the annual program for training under the Environmental Protection 7 modules were held, related to the activities of the company. In 2016 more than 10 different internal and external initiatives were implemented, related to environmental protection, including the traditional participation in the *European week for waste reduction 2016*.

Waste management

The Company strictly complies with the Bulgarian waste management legislation. In 2016, the following was submitted for disposal, recovery or recycling:

- 36.22 tons of hazardous waste, including 30 tons of asbestos containing materials
- 44,233 tons of non-hazardous waste, which do not include sludge from Sofia WWTP to be utilized on agricultural areas
- 19,358 tons (dry substance) - sludge from the Sofia WWTP to be utilized on agricultural areas

Green energy production

Over the period January – December 2016, 21,008,977 MWh of green energy were produced in Kubratovo WWTP. The production is based on a CHP installation for utilization of the biogas, released in the process of sludge treatment in the plant. In 2016 the green energy produced in the treatment plant meets 111.29 % of the energy needs of the treatment plant.

HEALTH AND SAFETY AT WORK

Health and safety at work is a fundamental value and priority for SV.

Occupational Health and Safety Management System (OHSAS)

SV has a certified occupational H&S management system in line with the requirements of the OHSAS 18001 from 2008.

The applicable normative requirements are met and exceeded. The annual program for the audit on occupational health and safety is implemented. The health and safety risks are assessed and managed systemically.

Trainings and exchange of information

The annual schedule for H&S trainings for 2016 was implemented. 579 employees took part in at least one H&S training in 2016.

Two information campaigns on Health and Safety at Work were implemented: Safe Driving of Company Motor Vehicles (January 2016) and Corporate Safety Week (September 2016), which was focused on five significant risk and standards for their management: excavation works, confined spaces, chemicals, fireworks, traffic management.

The potential subcontractors are assessed by their competence and performance in terms of Health and Safety at Work. The subcontractors are inspected by “Health and Safety” Dept. Information is being exchanged as well as good practices in the field of occupational health and safety.

Accidents, incidents and near-miss incidents

In 2016 there were nine occupational accidents (seven as per art.55 para.1– during work and two as per art. 55, para 2 –on way to work). There were also 2 incidents (without loss of work capacity), 21 near –miss incidents (adverse events, without personal injury), and 161 traffic accidents with company vehicles without injuries. All accidents, incidents and near miss incidents were reported and analyzed immediately so that preventive actions are taken.

HUMAN RESOURCES MANAGEMENT

In its policy and practice SV develops and applies modern forms of human resource management with the awareness that these factors are of vital importance for business development and achievement of high results. The achievement and maintenance of a balance between the interests of the employer and the workforce are based on compliance with the legislation, maintaining high budget discipline and social partnership with the trade unions.

Human resources management is developed by applying a complex of policies and procedures planned in advance so that the entire management team can be involved in the process.

Remuneration and benefits

Valid as of January 1 the salaries of the employees were increased by 0.61%.

In March 2016 the annual bonuses were paid to the employees for the previous year in line with the approved bonus scheme of the Company, taking into account the fulfillment of the Company's business objectives agreed in the previous year.

As of 1 July the salaries of the employees with the lowest remunerations were increased on average by 6.8% after consultations held with the trade union organizations, presented in the company.

After completing a PPA procedure, a new one-year contract on Supplementary Voluntary Health Insurance was signed in April. This benefit package aims at providing employees choice and access to a wide range of health services.

Sofiyska Voda signed agreements with two companies - "Benefit Systems Bulgaria" and "Sodexo Pass Bulgaria" for sport passes. The employees have access to a variety of sport activities and clubs at a preferential price.

Training, motivation and development

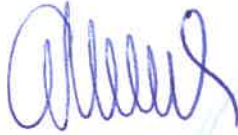

In 2016 were implemented 84 training topics with more than 2100 participations.

Two Bulgarian students participated in the Summer Campus of Veolia for 2016. This year for the first time Bulgarian students were given the opportunity to take part in it. Within a week in Paris, the students were taught theory and were provided with hands-on experience by visiting different sites of the company and participating in discussions with experts in the field of natural resources management. In the campus the students solved also difference cases.

For second year in a row SV selected representatives and took part in Company Sport Games. At the World Company Sport games SV employees won two gold medals in the chess and volleyball competitions.

The internship program of Sofiyska Voda "Challenge the Future 2016" commenced on 4th of July. A total of 20 enthusiastic trainees determined to develop their knowledge and to gain professional skills in our company joined the following departments: Illegal connections, Control Center, Customer Service, H&S, Laboratory Testing Center, GIS, Asset Management, Construction Control, WWTP, Leak Detection, Environmental Services, Customer Technical Support and Non-regulated Business. Positions were proposed to six of the trainees in the departments LTC, Debt Collection, Sewer Modelling, H&S and Control Room.

A process of Counselling and Career orientation for employees was held in October. The HR team held individual meetings with 19 employees who had expressed his/her wishes for Career Development at the Annual Appraisal Form. The aim of the meetings was to let the employees share their professional plans and receive information about the opportunities and ways to have professional realization within the company.

CORPORATE GOVERNANCE DECLARATION

SOFIYSAK VODA JSC

31 DECEMBER 2016

CORPORATE MANAGEMENT CODE

Sofiyska Voda JSC follows, where appropriate, the National Code for Corporate Management, created in 2007 and approved by the National Commission for Corporate management, and amended in February 2012 and April 2016

MAIN CHARACTERISTICS OF THE SYSTEMS FOR INTERNAL CONTROL AND RISK MANAGEMENT OF THE COMPANY IN CONNECTION WITH THE PROCESS OF FINANCIAL REPORTING

SV develops its internal control system based on best accounting practice and COSO model (COSO - Committee of Sponsoring Organizations of the Treadway Commission) The five components of internal control according to the model are:

- i. Control Environment
- ii. Risk Assessment (Process of Enterprise Risk Assessment)
- iii. Information and Communication (Information system, included the related to it business processes referring to financial reporting and communications)
- iv. Control Activities
- v. Monitoring (Ongoing monitoring of the controls)

These components are also set out in the International Standard on Auditing (ISA) 315, Appendix 1 – Internal Control Components.

The control environment sets the tone of an entity, influences the control consciousness of people within an organization and is the foundation for all other components of the internal control, providing discipline and structure. The factors of the control environment comprise: integrity and ethical values; employees' commitment to competence; management's philosophy and operating style; the way management assigns authority and responsibility, and organizes and develops its employees; as well as attention and guidelines, given by the Board of Directors.

Main policies and procedures ensuring the control environment are:

- Code of Ethics of Veolia Environnement (adopted by SV in June 2011)
- Ethics, Commitment and Responsibility of Veolia Environnement (adopted by SV in Oct 2012)
- Internal Code of Conduct
- Disclosure (Whistleblowing) Policy
- Hospitality Policy
- Conflicts of Interest Policy
- Anti-Fraud Policy, which is supported by
 - Fraud Investigation Procedure
 - Anti-Corruption telephone line (+359 2 8122 521, published on SV official web site www.sofiyskavoda.bg)
- Accounting Policy
- Procedure on accounting closing
- Procedure on receiving and posting invoices to suppliers
- Policy for purchasing, stocktaking and writing off of assets etc.

SV like every entity faces a variety of risks from external and internal sources that must be assessed. A precondition to risk assessment is establishment of objectives, linked at different levels and internally consistent. Risk assessment is the identification and analysis of relevant risks to achievement of the objectives, forming a basis for determining how the risks should be managed. Because economic, industry, regulatory and operating conditions will continue to change, mechanisms are needed to identify and deal with the special risks associated with changes.

SV's risk management process is regulated by a Risk Management Policy and supported by Business Risk Management Procedure, which describes the methodological approach at the identification, measuring, controlling and subsequent monitoring of these circumstances, event and actions that could impact the achievement of the business objectives of the company.

All personnel must receive a clear message from top management that control responsibilities must be taken seriously. They must understand their own role in the internal control system, as well as how individual activities relate to the work of others. They must have a means of communicating significant information upstream. Effective communication with external parties, e.g. customers, suppliers, regulators and shareholders should be in place.

SV's Communications Department focus on internal as well as external exchange of information with the stakeholders. In addition, SV's Regulation and Concession Compliance Department is in charge of information exchange with the Municipality of Sofia, EWRC and other institutions. The relations with the customers are managed by the teams in "Customer Service" Directorate.

The intranet and the official website of the company are also a two-way channel for exchange of information both inside and outside the company.

Control activities are the policies and procedures that help ensure that management directives are carried out. They help ensure that necessary actions are taken to address risks related to achievement of the entity's objectives. Control activities occur throughout the organization, at all levels and in all units. They include a range of activities as approvals, authorizations, verifications, reconciliations, reviews of operating performance, security of assets and segregation of duties.

All effective policies, procedures and instructions on the specific work processes are published on SV's Intranet, which is accessible to all employees. The process of preparation of internal regulatory documents (policies, procedure, and instructions) is unified and described in an official internal procedure.

Monitoring – the internal control systems need to be monitored - a process that assesses the quality of the system's performance over time. This is accomplished through ongoing monitoring activities, separate evaluations or a combination of the two. Ongoing monitoring occurs in the course of operations. It includes regular management and supervisory activities, and other actions personnel take in performing their duties. The scope and frequency of separate evaluations depend primarily on an assessment of risks and the effectiveness of ongoing monitoring procedures.

The management is primarily responsible for the internal control system and the chief executive officer is assumed to be "owner" of the system. Management is accountable to the board of directors, which provides corporate governance, guidance and supervision.

The audit committee of Sofiyska Voda is created and operates (including by implementing its obligations for monitoring regarding financial reporting) under the Law for the Independent Financial Audit.

Internal auditors play an important role in evaluating the effectiveness of control systems, and contribute to ongoing effectiveness. Because of organizational position and authority in an entity, the internal audit unit often plays a significant monitoring role.

The weaknesses of internal control, identified during internal audits, inspections and monitoring are reported to the managers and the most serious matters are referred to the senior management and the Board of Directors.

Internal control is, to some degree, the responsibility of everyone in an organization and therefore should be stated in the requirements of everyone's job description. Virtually all employees produce information used in the internal control system or take other actions needed to effect control.

External parties also carry out monitoring over the activity of Sofiyska Voda and these are the regulatory bodies (Energy and Water Regulatory Commission), state institutions (tax authorities, ministries etc.) and external auditors.

Significant direct and indirect shareholdings (including indirect shareholdings through pyramid structures and cross shareholdings) within the meaning of Article 85 of Directive 2001/34/EC

In 2016 the company did not acquire significant direct or indirect shareholdings by the virtue of art. 85 of Directive 2001/34/EC

The holders of any securities with special control rights and a description of these rights:

The company does not have securities with special control rights.

Any restrictions on voting rights, such as limitations of the voting rights of holders of a given percentage or number of votes, deadlines for exercising voting rights, or systems whereby, with the company's cooperation, the financial rights attaching to securities are separated from the holding of securities;

There are not any limitations of the voting right

The rules governing the appointment or replacement of board members and the filing of amendments of the articles of association;

The rules regulating the appointment or change of the Board members and filing of amendments to the articles of association are defined in the Statutes of the Company, which is made public under the account of Sofiyska Voda JSC in the Trade Register. As per art.10, para.1 of the Statutes, the General Shareholders' Meeting appoints and removes the Board members and determines their remuneration. As per art.18, para.1 of the Statutes, the Board of Directors shall consist at any time of at least 7 and not less than three Board members, and as per art.18, para.2 of the Statutes, while ViK EAD is a shareholder in the Company, it may appoint three directors.

The amendments to the articles of association are regulated by the Statutes of the Company, and the consent of the senior lender, the EBRD, is also needed for an amendment to the articles of association as per art.6.11. of the Loan Agreement.

The powers of board members, and in particular the power to issue or buy back shares;

The members of the Board of Directors do not have powers to issue or buy back shares

MEMBERS AND FUNCTIONING OF THE ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES AND THEIR COMMITTEES

Sofiyska Voda JSC has one-tier board system

Members of the Board of Directors:

The Board of Directors consists of 7 members

Functioning of the Board of Directors

The functioning of the management body of the company – the Board of Directors is regulated in the Statutes of the Company. In art 19 thereof the main duties are stated and in art. 20 and 21 detailed rules are presented for the procedure for conduct of meeting of the Board of Directors, its convening and the requirements for quorum for a valid taking of decisions and the preparing of meeting minutes. In article 22 the rights of the BoD Members are laid down and in art. 23 is commented the matter with the remunerations of the members of the Board of Directors.

Administrative bodies:

The organizational structure of Sofiyska Voda AD consist of an Executive Director and 11 main directorates, namely: *Finance Directorate, Human Resources and Administration Directorate, Logistics and Supply Chain Directorate, Security Directorate, Internal Audit, Quality Assurance and Risk Management Directorate, Commercial Directorate, Network Management Directorate, Operation and Maintenance Directorate, Engineering and Construction Works Directorate, Strategic Partnerships and Projects Directorate and Information Technologies Directorate.* The *PR and Communications* Department also reports directly to the Executive Director.

Within the scope of each directorate there are a certain number of departments and units related to the main functions of the directorate. These are as follows:

- *Financial Directorate – Financial Accounting Unit, OPEX Control Unit and CAPEX Control Unit*
- *Human Resources and Administration Directorate – Human Resources Department and Secretariat Department*
- *Logistics and Supply Chain Directorate – Warehouse, Procurement Department, Transport Department and Facility Department*
- *Internal Audit, Quality Assurance and Risk Management Directorate – Health and Safety at Work Department, Internal Audit Department, Environmental Protection Department and Laboratory Testing Complex Department*
- *Commercial Directorate – Billing and Debt Collection Department, Customer Service Department and Quality Management Unit*
- *Network Management Directorate – Geographic Information Systems Department, Strategic Network Management and Planning Department and Technical Customer Support Department*
- *Operations and Maintenance Directorate – Chief Engineer “Operation and Maintenance”, Potable Water Treatment and Disinfection Department, Sewerage and Wastewater Treatment Department, Electrical and Mechanical Maintenance Dept., Non-regulated Business Department, External Water Supply Department, Control Center Dept., Quality Management Unit and Contract Management Unit*
- *Engineering and Construction Works Directorate – In-House Failures and Maintenance Department, Asset Management Department, Capital Works Delivery Department, Relations with Institutions Unit, Management of Failure Contracts with Contractors Unit and Capital Project Contract Management Unit*
- *Strategic Partnerships and Projects Directorate – Legal Department, RCCU Department*
- *Information Technologies Directorate – IT Operations Department, Strategic Services Department and IT Program Office and Control Unit.*

Audit Committee:

Members of the audit committee:

The Audit Committee of Sofiyska Voda consists of 5 members.

Functioning of the audit committee:

The Audit Committee is created and functions in compliance with the requirements of the Law for the Independent Financial Audit. The Audit Committee has established Statutes, which regulates in more detail how the functions and task of the committee are implemented, how work is organized, what the necessary quorum for the conduct of meetings and taking of decisions is. The committee conducts meetings at least 4 times a year and at least once every quarter. It is allowed to summon additional meetings as well initiated by each member of the committee. Company management is invited and on a regular basis takes part in the meetings of the Audit Committee. The meetings are documented. The audit committee prepares an annual report for its activity to the General Assembly of the Shareholders.

DESCRIPTION OF THE DIVERSITY POLICY, APPLIED REGARDING THE ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES OF SOFIYSKA VODA JSC in connection with aspects such as age, sex or education and professional experience, the objectives of the diversity policy, the way of its application and the results over the reporting period, when such policy is not applied, the declaration contains clarification regarding the reasons for it.

Under the Ethics Guide, approved by the company at the beginning of 2014, Sofiyska Voda JSC as part of Veolia Group commits to conducting business in compliance with national laws and the relevant recommendations of international organizations, in particular with respect to observance of fundamental principles, taking account of cultural diversities and promoting environmental protection

This document provides guidelines regarding the everyday conduct of all employees, at all levels of the company and determines the commitment of all in the company to conduct our business as professionals, treating our customers with respect and meeting our responsibilities in the best possible way.

The company is aware of its responsibilities and places great importance on upholding the values and rules of behavior described below in the Ethics Guide both with regard to its employees, and on fostering such values and rules with regard to its other stakeholders; particularly its customers and suppliers and citizens. The practices described in this ethics guide are aimed at ensuring compliance with:

- The values and rules of behavior specific to Veolia;
- International initiatives that the group has joined, in particular the United Nations Global Compact, as well as international human rights law and the OECD (Organization for Economic Co-operation and Development) Guidelines for Multinational Enterprises; and
- Local laws in all countries in which the group is present.

In a complex and multicultural world that is constantly changing, this guide serves as a reference for all employees. It should enable employees to act as guarantors of these values and to perform their duties with full knowledge of their rights and obligations vis-à-vis the company and its stakeholders.

Veolia's core values are responsibility, solidarity, respect, innovation and customer focus, and they form the base on which its economic, social and environmental performance is built.

The company strives therefore to enable them to grow professionally and personally by developing an effective and ambitious corporate model. Accordingly, the company places great importance on basing its social initiatives on four key principles: equity, solidarity, developing the employability of employees and preventing occupational health and safety risks.

The company committed to guaranteeing equity in the workplace

This means creating the conditions for properly recognizing what each employee contributes to the company's success, thereby enabling each individual to improve his/her performance. Since the company is convinced that the diversity of its employees is a significant asset for the success of the company, it strives to recognize the efforts and merits of each of them and to ensure that employees fully share its projects and values, so that they feel that they have a stake in the company's performance. Feeling that they are integrated, respected and treated equitably is essential for employees' everyday commitment, which also implies the promotion of diversity, non-discrimination and refusal of all forms of harassment.

The next significant commitment of the company regarding employees is **fostering the employability of employees**. This means supporting employees' skills development, and encouraging employees to exchange ideas, innovate and meet professional challenges. In a service business, employees' know-how is the primary resource. The aim of the company for continuous improvement of the management of its human resources is bolstered by an active professional training and career support policy. The company strives to continually improve its response to the constant changes in its business.

Veolia is fully aware that its employees' expertise is a key asset and encourages experience-sharing and offers its employees motivating prospects throughout their careers.

Notes to the separate financial statements

1. Reporting entity

Sofiyska Voda AD (the Company) is a company registered in Sofia City Court on 28 December 1999 under company case № 16172/1999 / №54111, p.557, registration. 1, page 20 and registered as per the Public Register Act in the Public Register to the Registry Agency under uniform identification code 130175000.

The address of the registered office of the Company is Bulgaria, Sofia , bl. Mladost 4, 1 Business Park Sofia Str, building 2A. The Company is 77.1% owned by Veolia Voda (Sofia) BV and 22.9% owned by Vodospripravane and Kanalizatsia EAD.

The Company's business is the provision of water-supply and wastewater treatment services in the Municipality of Sofia, including management and maintenance of the public assets which represent part of the main water and wastewater-treatment system in Sofia as well as design, construction, financing and managing of new assets.

On 23 December 1999, Sofiyska Voda AD signed a Concession Contract through which the Municipality of Sofia granted to the Concessionaire (Sofiyska Voda AD) a specific right for use of the public assets and exclusive right to provide the Services within the Concession Area for a period of 25 years. The Services include the provision of water, sewerage and wastewater treatment services.

2. Basis of accounting**(a) Statement of compliance**

These financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) as adopted by the European Union.

These are the Company's separate financial statements prepared by law by Sofiyska Voda AD as a parent company where the investments in subsidiaries are presented at acquisition cost less impairment. Sofiyska Voda AD also prepares consolidated financial statements.

The separate financial statements as of and for the year ended 31 December 2016 were approved for issuance by the Board of Directors on 27 March 2017.

(b) Basis of measurement

The separate financial statements have been prepared on historical cost basis except for the following positions in the statement of financial position:

- the defined benefit liability is recognized at the present value of the defined benefit obligation
- liability under additional Settlement agreement with Municipality of Sofia is recognized at the present value of the expected future cash outflows

(c) Functional and presentation currency

The separate financial statements have been prepared in Bulgarian leva (BGN), which is the Company's functional currency. All financial information presented in BGN has been rounded to the nearest thousand unless otherwise indicated.

(d) Going concern

These separate financial statements have been prepared on the assumption that the Company will continue to operate as a going concern in the foreseeable future.

As at 31 December 2016, its current liabilities exceed its current assets by BGN 65,986 thousand due to the fact the intercompany loan (subordinated loan) contract expires at the end of April 2017 and is presented as short term.

Notes to the separate financial statements

2. Basis of accounting (continued)**(d) Going concern (continued)**

The management of the Company is in process of negotiation of further extension of the subordinated loan with Veolia Group and expects a positive outcome. The Company has the support from the Group, evidenced with a letter of support issued by the Group on behalf Veolia CEE, the sole owner of Veolia Voda (Sofia) BV – the direct parent company of Sofiyska voda, which has expressed intention not to request repayment of the liabilities of Sofiyska voda to it or its subsidiaries for the next at least 12 months from the reporting date.

Therefore the risk of not repaying the intragroup subordinated loan, if it becomes due in the following year, which would also incur an event of default for the loan A obtained from an international financial institution, is considered remote.

During the year, the Company continued to generate a net profit after tax, which reached BGN 25,052 thousand in 2016 (2015: BGN 22,469 thousand). Cash and cash equivalents increased with BGN 401 thousand, compared to 2015, thus amounting to BGN 17,219 thousand. During the year, the Company regularly serviced its liabilities to suppliers, excluding subordinated debt principals. There are no overdue liabilities to external parties.

Considering the above, the management has a reasonable expectation to believe that the available capital resources and sources of financing (cash flows from operating activities) will be adequate to meet all other Company's obligations in the course of 2017.

(e) Use of estimates and judgments

In preparing these separate financial statements, management has made judgments, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

(i) Judgments

Information about critical judgments made in applying accounting policies that have the most significant effect on the amounts recognized in these separate financial statements is included in the following notes:

- Note 3 (d) and Note 3 (k) (ii) – Accounting for intangible assets approach under IFRIC 12, Service Concession Arrangements and related revenue from construction services
- Note 3 (d) (iii) – Intangible assets: Subsequent costs and capitalization

(ii) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment in the next financial year is included in the following notes:

- Note 16 – Estimation of the recoverable amount of trade receivables from clients
- Note 26 – Measurement of defined benefit obligations and personnel liabilities
- Note 21 – Estimation of the liability to Municipality of Sofia as per Settlement Agreement
- Note 22 and Note 27 – Provisions and Contingencies – key assumptions about the likelihood and magnitude of an outflow of resources

Notes to the separate financial statements**2. Basis of accounting (continued)****(e) Use of estimates and judgments (continued)***Fair values*

A number of the Company's accounting policies and disclosures require the measurement of fair value, for both financial and non-financial assets and liabilities.

The Company has an established control framework with respect to the measurement of fair values.

The financial department regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services is used to measure fair values, then the financial department assesses the evidence obtained from third parties to support the conclusion that such valuations meet the requirements of IFRS, including the level in the fair value hierarchy in which such valuations should be classified.

Significant valuation issues are reported to the Company's Executive Director.

When measuring the fair value of an asset or liability, the Company uses market observable data as far as possible. Fair values are categorized into different level in a fair value hierarchy based on the inputs in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or liability might be categorized in different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note 24 – Financial instruments

Notes to the separate financial statements**3. Significant accounting policies**

The significant accounting policies set out below have been applied consistently to all periods presented in these financial statements.

(a) Foreign currency

Transactions in foreign currencies are translated to the functional currency of the Company at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the exchange rate when the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Foreign currency differences are generally recognized in profit or loss.

However, foreign currency differences arising from the translation of the following items are recognized in OCI:

- available-for-sale equity investments (except on impairment in which case foreign currency differences that have been recognized in other comprehensive income are reclassified to profit or loss); or
- qualifying cash flow hedges to the extent the hedges are effective.

From 1 January 1999 the exchange rate of the Bulgarian lev (BGN) has been fixed against the Euro (EUR). The exchange rate is BGN 1.95583 / EUR 1.0.

(b) Financial Instruments

The Company classifies non-derivative financial assets into the category loans and receivables.

The Company classifies non-derivative financial liabilities into the other financial liabilities category.

(i) *Non-derivative financial assets and financial liabilities – recognition and derecognition*

The Company initially recognizes loans and receivables on the date they originated. All other financial assets and financial liabilities are initially recognized on the trade date.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred, or it neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control over the transferred asset. Any interest in such derecognized financial assets that is created or retained by the Company is recognized as a separate asset or liability.

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire.

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Notes to the separate financial statements

3. Significant accounting policies (continued)**(b) Financial instruments (continued)****(ii) Non-derivative financial assets – measurement*****Loans and receivables***

These assets are initially recognized at fair value plus any directly attributable transaction costs. Subsequent to initial recognition they are measured at amortized cost using the effective interest method.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with initial maturity of three months or less of the acquisition date, which are associated with insignificant risk of changes in fair value and are used by the Company to manage short-term commitments.

(iii) Non-derivative financial liabilities – measurement

Non-derivative financial liabilities are initially recognized at fair value less any directly attributable transaction costs. Subsequent to initial recognition, these liabilities are measured at amortized cost using the effective interest method.

(iv) Share capital***Ordinary shares***

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of ordinary shares and share options are recognized as a deduction from equity, net of any tax effects. The equity of the Company is presented at historical cost as at the date of registration.

(c) Property, plant and equipment**(i) Recognition and measurement**

Items of property, plant and equipment are initially measured at cost which includes purchase price, including import duties and non-reimbursable taxes on purchase, as well as all other expenses directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the following:

- cost of materials and direct labor;
- any other costs directly attributable to bringing the assets to a working condition for their intended use;
- when the company has the an obligation to dismantle the asset or restore the site, estimate of the costs of dismantling and restoring the site on which they are located;
- capitalized borrowing costs.

Purchased software, that is essential for the functioning of the purchased equipment, is capitalized as part of the equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Gains and losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net in profit or loss.

Subsequent measurement

After recognition as an asset, an item of property, plant and equipment is measured at its cost less accumulated depreciation and accumulated impairment losses (see Significant accounting policy 3 (h)).

Notes to the separate financial statements

3. Significant accounting policies (continued)

(c) Property, plant and equipment (continued)

(ii) Subsequent costs

Any subsequent expenditures are being capitalized only if it is probable that the future economic benefits embodied within the part will flow to the Company. The costs of the day-to-day servicing of property, plant and equipment are recognized as loss as incurred.

(ii) Depreciation

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment, since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term. Land is not depreciated.

The estimated useful lives of property, plant and equipment are as follows:

• buildings	25 years
• plant and equipment	5-25 years
• vehicles – automobiles	5-10 years
• vehicles – trucks	10-12,5 years
• improvements of leased assets	10 years

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

(d) Intangible assets

IFRIC 12, Concession service arrangements

As stated in Note 1, Sofiyska Voda AD is a party in a concession contract with Municipality of Sofia (Grantor), and as a result a specific right emerges for the Company - granting it the use of public assets as well as an exclusive right to render water supply and sewerage services within the concession area – the territory of the Municipality of Sofia.

Taking into account the concession contract with the Municipality of Sofia, the requirements of IFRIC 12 have been applied, and consequently an intangible asset “concession right” has been recognized in the financial statements of the Company. As the concession agreement includes a requirement for the Company to deliver construction services to the grantor in order to enhance the infrastructure, the Company delivers construction services in consideration for an enhancement to its right to collect tariffs from users of the network and records revenue as it performs the services for water supply, sewerage and waste water treatment to the customers on the territory of the concession.

(i) Intangible asset “concession right”

The intangible asset “concession right” is recognized at acquisition cost less accumulated amortization and impairment losses (see accounting policy 3 (h)). The intangible asset “concession right” arises in relation to the Concession Agreement, which sets Sofiyska Voda’s right of use of public assets in order to deliver water supply, sewerage and waste water treatment services within the concession area.

The Grantor has the ownership rights on all the existing public assets for the concession period, but the Concessionaire has exclusive and specific right to use the existing public assets. The ownership rights of any new assets are transferred to the Grantor at the time of their acquisition by the Concessionaire or at the beginning of their operation. The Company does not have the right to receive any payments from Grantor related to the acquisition or construction of new public assets. The improvements in the public assets are capitalized and represented as improvements in the intangible asset “concession right”.

Notes to the separate financial statements

3. Significant accounting policies (continued)**(d) Intangible assets (continued)****(ii) Other intangible assets**

Other intangible assets, acquired by the Company, that have limited useful life, are stated at acquisition cost less accumulated amortization and impairment losses.

(iii) Subsequent expenditure

Subsequent expenditures are capitalized only whenever it is probable that they lead to future economic benefits from the specific asset they are related to. All other expenditures are expensed as incurred.

Based on assessment and expertise of internal experts of the Company, it is considered that when a pipe less than 10 meters long is replaced, it does not increase the life of the conduit and is accounted for as an expense immediately. In contrast, replacement of a pipe with length equal to or more than 10 meters extends the life of the pipeline with more than one year and is capitalized.

(iv) Amortization

Amortization is charged to the profit or loss on a straight-line basis over the estimated useful lives of the intangible assets, apart from the concession asset, which is depreciated for the term of the concession.

Other intangible assets:

- capitalized development costs 6.67 years
- other intangibles 6.67 years
- software 10 years

Amortization methods, useful lives and residual values are reviewed at each reporting date.

(e) Leased assets

Leases in terms of which the Company assumes substantially all the risks and benefits of ownership are classified as finance leases. Upon initial recognition the leased assets are measured at cost equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to it.

Other leases are operating leases. The leased under operating lease assets are not recognized in the Company's statement of financial position.

(f) Investments*Investments in subsidiaries*

Subsidiaries are the enterprises controlled by the Company.

The investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Therefore, an investor must possess all of the following elements to be deemed to control an investee:

- power over the investee
- exposure, or rights, to variable returns from its involvement with the investee; and ability to exert power over the investee to affect the amount of the investor's return;

Investments are accounted for in the separate financial statements under the cost method. On initial recognition the investment is recognized at cost, including the amounts paid and the attributable expenses: fees, commissions, royalties, non-refundable taxes, etc.

Notes to the separate financial statements**3. Significant accounting policies (continued)****(g) Inventories**

Inventories are measured at the lower of cost and net realizable value. The cost of inventories is based on the weighted average cost principle.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated selling expenses.

(h) Impairment**(i) *Non-derivative financial assets***

Financial assets not classified as at fair value through profit or loss, are assessed at each reporting date to determine whether there is objective evidence of impairment.

Objective evidence that financial assets are impaired can include default or delinquency by a debtor, restructuring of an amount due to the Company on terms that the Company would not consider otherwise, indications that a debtor or issuer will enter bankruptcy etc.

Financial assets measured at amortized cost

The Company considers evidence of impairment for receivables at both a specific asset and collective level. All individually significant receivables are assessed for specific impairment. Those found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Receivables that are not individually significant are collectively assessed for impairment by grouping together receivables with similar risk characteristics.

In assessing collective impairment the Company uses historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgments as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical trends.

The impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. The impairment loss is recognized in profit and loss and results in decrease of the receivables. When the Company considers that there are no realistic prospects of recovery of the asset, the relevant amounts are written off. If the amount of impairment loss subsequently decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through profit or loss.

Notes to the separate financial statements

3. Significant accounting policies (continued)

(h) Impairment (continued)

(ii) Non-financial assets

The carrying amounts of the Company's non-financial assets, (other than inventories and deferred tax assets) are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable value is estimated. An impairment loss is recognized if the carrying amount of an asset or its related cash-generating unit (CGU) exceeds its estimated recoverable amount.

The recoverable amount of an asset or a cash-generating unit (CGU) is the higher of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU.

Impairment losses are recognized in profit and loss. Impairment losses recognized in respect of cash-generating units are allocated in such way as to reduce the carrying amount of the assets in the CGU (group of CGUs) on a *pro rata* basis.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

(i) Employee benefits

(i) Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Government of Bulgaria is responsible for providing pensions in Bulgaria under a defined contribution pension plan. The Company's obligation for contributions to the defined contribution pension plan are recognized as an employee benefit expense in profit or loss in the periods during which services are rendered by employees. The contributions on a defined contribution plan, that are payable more than 12 months after the end of the period of service rendering by employees, are discounted to their present value.

(ii) Defined benefit plans

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit pension plans is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value.

The Company has obligation to pay certain amounts to each employee who retires with the Company in accordance with Art. 222, § 3 of the Labour Code. According to the regulations of the Collective Labour agreement, when a labour contract of a company's employee, who has acquired a pension right, is ended, the Company is obliged to pay him compensations amounted to two gross monthly salaries. If the employee's length of service in the Company equals to or is greater than 10 years, as at retirement date, then the compensation amounts to seven gross monthly salaries. As at the reporting date the management estimates the amount of such expenses based on a report prepared by a qualified actuary using the projected unit credit method. The estimated amount of the obligation and the main assumptions, on the base of which the estimation of the obligation has been made, are disclosed to the financial statements in Note 26.

Re-measurements arising from defined benefit plans comprise actuarial gains and losses and are recognised in OCI. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

Notes to the separate financial statements

3. Significant accounting policies (continued)**(i) Employee benefits (continued)****(iii) Short-term personnel benefits**

Short-term employee benefit obligations are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

(j) Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognized as finance cost.

Legal liabilities provision

Legal liabilities provisions are included in the Company's financial statements as a result of existing legal liabilities on court actions concerning past events. Estimation of the provision is carried out by the legal advisors of the Company based on all the facts and circumstances related to the expected cash outflows resulting from a hypothetical court decision in other party's favor.

(k) Revenue**(i) Rendering of services**

Revenue from services rendered is recognized in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed by analysis of the work performed.

The revenue from water supply, sewerage and waste water treatment services are realized by the Company as per the Concession Contract and the effective legislation, in particular the Law of Regulation of the water supply and sewerage services (LRWSSS) and the relevant subordinate legislation. As per Art.5 of LRWSSS, the prices of the water supply and sewerage services rendered are subject to regulation by the Energy and Water Regulatory Commission (EWRC)..

Revenue from water supply, sewage and waste water treatment is recognized on basis of quantities of water measured through the water measuring devices (WMD).

Key clients (large consumers) are measured and billed monthly of actual consumptions.

For the rest of the clients, as a general rule, actual measurement of clients' devices is performed once every three months. During the other two months, client's consumption is calculated and billed on basis of the average daily consumption from the last actual consumption. When the actual quarterly reading is made, the difference between already invoiced in the previous 2 months and actual reading on the third month is automatically calculated and invoiced in the third month. If it happens that the quantity of actual quarterly reading is lower than the sum of the previous two invoiced quantities, the consumption is adjusted up to the level of the actual reading by issuing of a credit note.

The interest income for overdue receivables is calculated as per the regulations on the legal interest rate (base rate + 10%).

Notes to the separate financial statements

3. Significant accounting policies (continued)**(k) Revenue (continued)****(ii) Construction contracts revenues**

Contract revenue includes the initial amount agreed in the contract plus any variations in contract work, claims and incentive payments, to the extent that it is probable that they will result in revenue and can be measured reliably.

If the outcome of a construction contract can be estimated reliably, contract revenue is recognized in profit or loss in proportion to the stage of completion of the contract. The stage of completion is assessed with reference to surveys of work performed. Otherwise, contract revenue is recognized only to the extent of contract costs incurred that are likely to be recoverable. An expected loss on a contract is recognized immediately in profit or loss.

Construction contracts bring revenue related to the investments in public assets – improvement and construction of new components of the water supply and sewerage system against the right to invoice and charge the customers for the service at the prices approved by EWRC. In this respect the Company recognizes an intangible asset “concession right” against crediting revenue from construction contracts upon termination of the works.

(l) Government grants

The Company recognizes government grants initially as deferred income at fair value when there is reasonable assurance that they will be received and the Company will comply with the conditions associated with the grant; they are then recognized in profit or loss as other income on a systematic basis over the useful life of the asset.

Grants that compensate the Company for expenses incurred are recognized in profit or loss as other income on a systematic basis in the same periods in which the expenses are recognized.

(m) Leases

Payments on operating leases are recognized in profit and loss on a straight-line basis over the term of the lease. Any additional payments made are recognized in profit and loss as an integral part of the total lease expenses over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the outstanding principal of the liability.

(n) Finance income and finance costs

Finance income comprises interest income and profit from transactions in foreign currencies, recognized in profit or loss. Interest income is recognized as it is accrued using the effective interest method.

Finance expenses comprise interest expense on borrowings, expenses resulting from increase in liabilities due to being one period closer to the date for realizing the provisions. Borrowing costs that are not directly attributable to the acquisition, construction or production of an asset, meeting the requirements for capitalization of interest, are recognized in profit or loss using the effective interest method.

Foreign currency gains and losses are reported on a net basis.

Notes to the separate financial statements**3. Significant accounting policies (continued)****(o) Income tax**

Income tax expense comprises current and deferred tax. It is recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in OCI.

Current tax

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable or receivable in respect of previous years. Current tax also includes any tax arising from dividends.

Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss;
- temporary differences related to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

In determining the amount of current and deferred tax the Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Company to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Notes to the separate financial statements

3. Significant accounting policies (continued)**(p) New standards and interpretations not yet adopted**

A number of new standards and amendments to standards are effective for annual periods beginning after 1 January 2016 and earlier application is permitted, although they are not yet mandatory until a later period; however, the Company has not early adopted the following new or amended standards in preparing these financial statements.

Standards, Interpretations and amendments to published Standards that have not been early adopted – endorsed by the EC:

(a) IFRS 15 Revenue from Contracts with Customers

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognized. It replaces existing revenue recognition guidance, including IAS 18 *Revenue*, IAS 11 *Construction Contracts* and IFRIC 13 *Customer Loyalty Programmes*. IFRS 15 is effective for annual periods beginning on or after 1 January 2018, with early adoption permitted.

Although it has not yet fully completed its initial assessment of the potential impact of IFRS 15 on the Company's financial statements, management does not expect that the new Standard, when initially applied, will have material impact on the Company's financial statements. The timing and measurement of the Company's revenues are not expected to change under IFRS 15 because of the nature of the Company's operations and the types of revenues it earns.

(b) IFRS 9 Financial Instruments

This Standard replaces IAS 39, *Financial Instruments: Recognition and Measurement*. Although the permissible measurement bases for financial assets – amortised cost, fair value through other comprehensive income (FVOCI) and fair value through profit and loss (FVTPL) – are similar to IAS 39, the criteria for classification into the appropriate measurement category are significantly different. The impairment model in IFRS 9 replaces the 'incurred loss' model in IAS 39 with an 'expected credit loss' model, which means that a loss event will no longer need to occur before an impairment allowance is recognised. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early adoption permitted. The Company currently plans to apply IFRS 9 initially on 1 January 2018.

The Company does not expect IFRS 9 to have material impact on the financial statements. The classification and measurement of the Company's financial instruments are not expected to change under IFRS 9 because of the nature of the Company's operations and the types of financial instruments that it holds. However the company believes that impairment losses are likely to increase and become more volatile for assets in the scope of expected credit loss impairment model. The company has not yet finalised the impairment methodologies that it will apply under IFRS 9.

(c) Amendments to IFRS 10 and IAS 28 Sale or contribution of assets between an investor and its associate or joint venture

The Company does not expect that the amendments, when initially applied, will have material impact on the financial statements.

Notes to the separate financial statements

3. Significant accounting policies (continued)
(p) New standards and interpretations not yet adopted (continued)*IASB/IFRIC documents not yet endorsed by EC:*

Management believes that it is appropriate to disclose that the following new or revised standards, new interpretations and amendments to current standards, which are already issued by the International Accounting Standards Board (IASB), are not yet endorsed for adoption by the EC, and therefore are not taken into account in preparing these financial statements. The actual effective dates for them will depend on the endorsement decision by the EC.

(a) Disclosure Initiative (Amendments to IAS 7)

The amendments require disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flow and non-cash changes. The amendments are effective for annual periods beginning on or after 1 January 2017, with early adoption permitted. To satisfy the new disclosure requirements, the Company intends to present a reconciliation between the opening and closing balances for liabilities with changes arising from financing activities.

(b) IFRS 16 Leases

IFRS 16 introduces a single, on-balance lease sheet accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are optional exemptions for short-term leases and leases of low value items. Lessor accounting remains similar to the current standard- i.e. lessors continue to classify leases as finance or operating leases. IFRS 16 replaces existing leases guidance including IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases-Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. The standard is effective for annual periods beginning on or after 1 January 2019. Early adoption is permitted for entities that apply IFRS 15 Revenue from Contracts with Customers at or before the date of initial application of IFRS 16.

These changes are not expected to have a significant impact on the financial statements of the Company. The Company has started an initial assessment of the potential impact on its financial statements. The Company has not yet quantified the impact on its reported assets and liabilities of adoption of IFRS 16. The quantitative effect will depend on, inter alia, the transition method chosen, the extent to which the Company uses the practical expedients and recognition exemptions, and any additional leases that the Company enters into. The Company expects to disclose its transition approach and quantitative information before adoption.

(c) Other amendments

The following changes are not expected to have a significant impact on the Company's financial statements.

- *Recognition of Deferred Tax Assets for Unrealized Losses (Amendments to IAS 12)*
- *Classification and Measurement of Share-based Payment Transactions (Amendments to IFRS 2)*
- *Amendments to IFRS 4: Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts*
- *Amendments to IAS 40 Transfers of Investment Property*
- *IFRIC 22 Foreign Currency Transactions and Advance Consideration*
- *Annual improvements to IFRSs 2014-2016 cycle were issued on 8 December 2016*

Notes to the separate financial statements

4. Revenue

<i>In thousands of BGN</i>	Note	2016	2015
Income from water supply		86,286	83,643
Income from sewerage		17,428	15,299
Income from waste water treatment		20,713	20,800
Interest income from overdue receivables		4,366	4,596
Income from service sales		2,147	1,986
Revenue invoiced to customers, which is to be transferred to meet the obligations regarding the financial memorandum ISPA*		(1,081)	(1,300)
Revenue invoiced to customers, which offsets the consideration for the new water and sewerage infrastructure financed by the Municipality of Sofia's budget	27(b)	(59)	(56)
		<u>129,800</u>	<u>124,968</u>

*According to an agreement dated 22 June 2007 between Sofiyska Voda AD and Sofia Municipality (MoS), and in relation to Financial Memorandum ISPA 2000 BG 16 P PE 001, signed between European Commission and Republic of Bulgaria, the Company is obliged to include in its price for water supply, sewerage and treatment of waste waters an adjustment, allowing it to accumulate the necessary annual funds for repayment of the Financial Memorandum loan that was received from the European Investment Bank (EIB). The total expected amount to be serviced by Sofiyska voda was approximately EUR 8,775 thousand representing 15% of the project value. The end beneficiary of the loan from the European Investment Bank is the Municipality of Sofia.

On basis of received attachments to MoEW letters from 7 November 2011 and 30 January 2012, it became known that respectively on 3 October 2011 and 13 January 2012, EIB disbursed two tranches of the agreed loan amounting to EUR 7,086 thousand. At the end, it became the final amount, because of expiry of the period of availability of the funds and no new utilizations could be made.

The payment started from the beginning of 2012 and will last in year 2030. Interest and principle are due to EIB on each 10th March and 10th September.

The Energy and Water Regulatory Commission, on basis of an indicative repayment schedule, approved a tariff adjustment, though the inclusion in the tariff of a certain amount for servicing and repayment of the EIB financing.

The Agreement stated above, specifies that upon the receipt of the relevant notices, the collected amounts from the clients of the Company as a result of the approved by the EWRC price component, should be transferred to the Ministry of Environment and Waters (MoEW) in a specially opened to service the loan bank account.

Having received a notice from the Municipality of Sofia in 2016, the Company transferred two installments for a total amount of BGN 900thousand to the bank account indicated by the Municipality of Sofia, to service the loan from EIB.

The portion of billed revenue in 2016, set aside for servicing and repayment of the EIB loan, based on the price component in the tariff, amounts to BGN 1,081 thousand (2015: 1,300 thousand), presented above as a reduction of the Company's yearly revenue.

14. Intangible assets (continued)

Acquired assets

The major acquisitions of intangible assets in 2016, which are transferred from Assets under construction, relate to the increase of the value of the Concession right and amount to BGN 37,222 thousand (2015: 32,839 thousand). The main components are listed below:

<i>In thousands of BGN</i>	2016	2015
Water supply network and house connections	16,506	16,796
Water Waste Treatment Plant Koubratovo	3,343	1,208
Sewerage and house connections	10,185	9,181
Hydrants and cranes	1,800	2,029
Water meters	2,053	2,142
Leasehold improvements	1,765	1,475
Pumping Stations	1,570	8
	<u>37,222</u>	<u>32,839</u>

Assets under construction

The major intangible assets under construction which relates to concession right amount to BGN 13,201 thousand (2015: 12,517 thousand). The most significant of them are listed below:

<i>In thousands of BGN</i>	2016	2015
Second stage of strengthening of Beli Iskar Dam	1,015	936
Waste Water Treatment Plant	1,006	1,629
Construction of water main system, water-main net model and DMA zones for reduction of unaccounted for water	3,730	4,819
Chlorinating stations	-	1
Construction of sewerage mains and sewerage model	2,717	3,197
Potable Water Treatment Plants	920	902
Impounding Structures	2,451	573
Rehabilitation of reservoirs, pumping stations, sanitary protection zones	1,274	457
Proactive replacement of stop valves, fire hydrants, water connections	89	3
	<u>13,202</u>	<u>12,517</u>

Assets pledged as collateral

The Company has pledged all its present and future non-current assets in respect of secured bank loan "A", besides for assets that are state owned.

Impairment test

In 2016 the Company performed impairment test of the cash generating unit due to changes in the regulatory environment, incl. price levels determined by the regulator. The CGU recoverable amount is based on its value-in-use for the period of concession (therefore there is no terminal value). The estimated value-in-use was determined based on discount factor of 8.7% after tax and average revenue increase until the end of the concession of 2.16%.

As a result of the impairment test no impairment losses of the CGU are identified.

Notes to the separate financial statements

15. Inventories

<i>In thousands of BGN</i>	2016	2015
Spare parts and consumables	1,064	1,346
	<u>1,064</u>	<u>1,346</u>

The balance of stock write down as at 31 December 2016 amounts to BGN 1,463 thousand (2015: BGN 1,408 thousand).

Inventories pledged as collateral

The Company has pledged all its present and future movables in respect of secured bank loan "A", which include raw materials and inventories.

16. Trade and other receivables

Cash and cash equivalents in the statement of cash flows	24	17,219	16,818

Cash at banks pledged as collateral:

The Company has pledged all its bank accounts under the requirements of a bank loan "A".

The Company's exposure to Interest rate risk and the sensitivity analysis of all financial assets and liabilities are stated in Note 24.

18. Capital and reserves

In thousands of shares

	Ordinary shares	
	2016	2015
On issue at 1 January	8,884	8,884
On issue as at 31 December – fully paid	8,884	8,884

As at 31 December 2016 the Company's share capital includes 8,884,435 ordinary shares (2015: 8,884,435). All shares have a nominal value of BGN 1. Shareholders in the Company as at 31 December 2016 are:

- Veolia Voda (Sofia) BV – 6,850,000 ordinary shares (77.1%);
- Vodospabdyavane i kanalizatsia AD - 2,034,435 ordinary shares (22.9%).

The ultimate parent of the Company is Veolia Environnement S.A., France.

With a pledged endorsement dated 19 December 2000 in favor of the bank which provided secured bank loan "A", 6,850,000 ordinary shares have been pledged and this fact is inscribed in the shareholders' book based on a contract for pledge of shares.

The holders of ordinary shares possess dividend rights and voting rights at the Company's General Shareholders Meeting of one vote for each share in their possession. All shares rank equally with regard to the Company's residual assets.

Legal reserves

Legal reserves are formed based on the requirement of the Bulgarian Commercial Law for transfer of 1/10 of the net profit to Reserves at least until the amount of 1/10 or more of the registered Company capital is reached.

Notes to the separate financial statements

19. Loans and borrowings

This note provides information on the contractual terms of the Company's interest-bearing loans and borrowings, which are measured at amortized cost. For more information about the Company's exposure to interest rate, foreign currency and liquidity risk, see note 24, *Financial instruments*.

<i>In thousands of BGN</i>	2016	2015
Non-current liabilities		
Loans at nominal value	27,203	36,266
Amortization	(272)	(473)

Finance lease liabilities	1,283	1,178
	81,507	81,255
Total loans and borrowings	110,318	118,517

In accordance with the loan agreement 'A' the Company has the obligation to maintain an Annual Debt Service Coverage Ratio (ADSCR) of 1.3:1. The ADSCR should show that at any Calculation Date (ending on 31 December) the ratio of Free Cash Flow for the preceding twelve month period to the aggregate amount of principal and interest payments falling due and payable during such period should be 1.3:1.

In accordance with the Amended and Restated Loan Agreement (ARLA) the calculation of the annual debt service coverage ratio is calculated by the bank by the means of a model based on the actual and estimated values as at the date of preparation. As per the internal calculations based on the actual cash flow for 2016 result in an actual ADSCR of 2.14:1 at the reporting date. The Company has the obligation of submitting the verified annual financial statements within 120 calendar days of the beginning of the year to the Bank. The Bank updates the calculations of the ratio for the past year in a new version of their model.

Terms and debt repayment schedule

<i>In thousands of BGN</i>	Currency	Nominal interest rate	Year of Maturity	31 December 2016		31 December 2015

Loan „A”	EUR	1.35 % plus 6 month EURIBOR*	2020	36,266	35,748	45,329	44,557
Loan „B”, subordinated and unsecured, from related party	EUR	5.95% plus 6 month EURIBOR	2017	71,117	71,407	71,118	71,313
Finance lease liabilities				3,163	3,163	2,647	2,647
				110,546	110,318	119,094	118,517

Notes to the separate financial statements

19. Loans and borrowings (continued)

*As of April 2011 the margin on Loan A has been reduced in accordance with the EBRD loan contract from 1.75% to 1.35% due to fact the Company has achieved debt service coverage ratio of above 1.41:1 for the previous year.

Finance lease liabilities

The finance lease liabilities are payable as follows:

<i>In thousands of BGN</i>	Future minimum lease payments 2016	Interest 2016	Present value of minimum lease payments 2016	Future minimum lease payments 2015	Interest 2015	Present value of minimum lease payments 2015
Less than 1 year	1,346	63	1,283	1,252	74	1,178
Between 1 and 2 years	1,485	55	1,430	920	32	887
2 to 5 years	455	5	450	601	20	582
	<u>3,286</u>	<u>123</u>	<u>3,163</u>	<u>2,773</u>	<u>126</u>	<u>2,647</u>

20. Deferred tax assets and liabilities

The deferred tax assets and liabilities are attributable to the following:

<i>In thousands of BGN</i>	Assets 2016	Liabilities 2016	Net 2016	Assets 2015	Liabilities 2015	Net 2015
Property, plant and equipment	-	(994)	(994)	-	(925)	(925)

22. Provisions

<i>In thousands of BGN</i>	2016	2015
Provision for court liabilities	<u>3,157</u>	<u>5,973</u>
	<u>3,157</u>	<u>5,973</u>

Provision for court liabilities

The provision is calculated on basis of estimation of the most likely outcome and historical evidence by the Company's internal lawyers.

Provisions are made for legal claims of contractual nature – indemnification of claimed damage due to emergencies related to assets operated by the Company, claims for refunds of amounts paid for assets construction, as well as claims for refund of asserted unduly paid bills.

Another group of legal cases for which a provision is made, are of labor legislative character and most often relate to potential payments of unemployment indemnifications to ex-employees in case the court pronounces the termination of the employment illegal.

In a separate group are the provisions in relation to the imposing of administrative sanctions, mostly due to findings for possible abuse of a dominant position. The most significant amount in the closing balance in the current financial period is due to provisions from this group. In accordance with order №370/19.03.2015 on the basis of art. 74, p.3 from Act for Protection of Competition (APC), the Commission for Protection of Competition initiated proceedings that Sofiyska Voda used its dominant position on the market in relation to charging interest for delayed payments on estimated bills for provided services under art. 21, p.1 from APC. The sanction amounts to BGN 4,800 thousand and is calculated based on 0.5% of Sofiyska Voda 2013 revenue, applying leverage ratio 8. The Company has undertaken measures to appeal the penalty imposed in compliance with the applicable legislation.

On 11 January 2016, the 3 panel body of Supreme Administrative Court (SAC) issued a decision regarding CPC case. In the decision, the penalty was decreased up to BGN 2,400 thousand from BGN 4,800 thousand. Sofiyska voda objected the decision at the next instance as well as the CPC. Court case 3161/2016 is open and the hearing was on 7 April 2016. The case is announced for resolution (still pending).

22. Provisions (continued)

The change in provisions throughout the year is presented below:

<i>In thousands of BGN</i>	Balance at 1 January 2016	Provisions made during the year	Provisions used during the year	Reversed provisions during the year	Discount effect	Balance at 31 December 2016

	<u>442</u>	<u>660</u>

24. Financial instruments

Financial Risk Management

Overview

The Company has exposure to the following risks from its use of financial instruments:

- credit risk;
- liquidity risk;
- market risk.

This note presents information about the Company's exposure to each of the risks listed above, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital.

Risk Management Framework

The Board of Directors has the responsibility for the establishment and supervision of the Company's risk management. The Board has established a Risk Management Committee which is responsible for the development and supervision on the Company's policies for risk management and the Committee is obliged to report regularly its actions to the Board of Directors.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Risk Management Committee of the Company monitors how the management ensures compliance with the risk management policies and reviews the adequacy of the risk management framework related to the risks the Company faces. The Committee is being assisted by the internal audit department. Internal audit undertakes both planned and unplanned inspections of the risk management controls and procedures and the results are reported directly to the management.

Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Credit risk arises from the Company's receivables from customers and investments in financial instruments.

24. Financial instruments (continued)

Exposure to Credit Risk

The carrying amount of the financial instruments represents the maximum credit exposure. The maximum credit exposure at the reporting date is:

<i>In thousands of BGN</i>	Note	Carrying amount 2016	Carrying amount 2015
Trade and other receivables	16	31,959	32,085
Receivables from related parties	30	69	62
Cash and cash equivalents (at banks)	17	17,219	16,742
		<u>49,247</u>	<u>48,889</u>

Trade and other receivables

The credit risk exposure of the Company results from the individual characteristics of the clients. The exposure also depends on the risk of non-payment common to the utilities sector. The Company is a monopolist in rendering its services on the territory of Sofia Municipality and as at 31 December 2016 the active clients of the Company are 632,550 (2015 – 617,245). Based on the analyses of the Company, the services rendered have low price elasticity. The prices are regulated by the State Energy and Water Regulation Commission. The Company does not require guarantees from its customers in relation to the services rendered, but is currently developing and implementing a policy to increase the debt collection. In addition, the Company uses external collection agencies in order to take advantage of the expertise and best practices, as well as up-to-date software support. The Company's efforts are orientated towards demanding active contact with customers, tracing results and using a customers' contacts history database and other operational statistics.

In view of the credit risk it can be said that the Company's ability to influence directly its customers' behavior is limited due to the legal framework and the complications at interruption of the consumption, as well as to the fact that the majority of uncollected trade receivables are owed by individual customers (households) and not institutional customers.

The carrying amount of trade receivables by type of customers represents the credit exposure at the reporting date of the Company's statement of financial position and it is as follows:

<i>In thousands of BGN</i>	Cost 31 December 2016	Impair- ment 2016	Carrying amount 31 December 2016	Cost 31 December 2015	Impair- ment 2015	Carrying amount 31 December 2015
State budget organizations	1,677	(472)	1,205	1,602	(376)	1,226
Commercial customers	11,231	(5,726)	5,505	10,816	(5,123)	5,693
Domestic population	94,503	(70,088)	24,415	86,974	(63,040)	23,934
Other customers	834	-	834	1,232	-	1,232
Related parties	69	-	69	62	-	62
	<u>108,314</u>	<u>(76,286)</u>	<u>32,028</u>	<u>100,686</u>	<u>(68,539)</u>	<u>32,147</u>

24. Financial instruments (continued)

Exposure to credit risk (continued)

The aging of trade receivables of the Company at the reporting date was:

<i>In thousands of BGN</i>	2016		2015	
	Cost	Impairment	Cost	Impairment
Not past due	19,721	(60)	19,823	(80)
Past due 30 days	2,859	(216)	3,072	(210)
Past due from 31-120 days	6,084	(875)	6,224	(965)
Past due from 121-210 days	5,011	(1,933)	4,562	(1,812)
Past due from 211-270 days	2,870	(2,372)	2,972	(2,447)
Past due from 271-360 days	3,832	(3,773)	3,670	(3,612)
Past due more than 1 year	67,868	(67,057)	60,301	(59,413)
	<u>108,245</u>	<u>(76,286)</u>	<u>100,624</u>	<u>(68,539)</u>

Impairment of not past due receivables is related to the Company's assessment of the risk of uncollectibility for certain population groups based on historical information.

Company's receivables impairment at reporting date, including court receivables impairment is:

<i>In thousands of BGN</i>	<i>Note</i>	2016	2015
Balance in the beginning of the period		(68,539)	(61,577)
Accruals during the period	24	(8,208)	(8,098)
Reintegrated impairment	10	-	-
Written-off		461	1,136
Balance in the end of the period		<u>(76,286)</u>	<u>(68,539)</u>

The quality of the trade and other receivables is assessed based on credit policy prepared by the Risk Management Committee and applied by the Company. The Company's management monitors the customers' credit risk by grouping trade and other receivables by characteristics as in 2016 it continues to carry out analysis of specific customers on the basis of precise proactive actions, working with them and the history of past communication. As of 2011 the Company has also introduced impairment of undue trade receivables for certain groups of customers, while as of 2016 the balances of customers with deferred payment agreements, which are not violated are excluded from the calculation of the impairment.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations relating to financial liabilities, ment to be met by cash or other financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or damaging the Company's reputation.

The Company management's efforts are focused on upholding in accordance with the regulatory framework in Bulgaria the necessary revenue using the tariff, which will make it possible to reach the goals, levels of services and investments set in the current Business Plan, in the same time taking into account the cost of capital, the level of expenditure, the consumption, the annual inflation and the achieved efficiency of operating and capital costs and also meeting the requirements of the main creditor (EBRD) regarding the service coverage ratio of the loan. In relation to that, Sofiyska Voda AD submits and justifies annual tariff applications as per the terms and procedures in the regulatory legislation.

24. Financial instruments (continued)

Liquidity risk (continued)

As to the cash outflow and the payments to contractors, the Company is seeking the balance between the optimization of the working capital cycle and the provision of adequate working conditions for maintaining viable partnerships.

Usually the company ensures that it has sufficient cash on demand to meet the expected operational expenses for a 60-day period, including the servicing of financial obligations except for the potential impact of extreme circumstances which cannot be envisaged, i.e. natural disasters. As at 2016 the Company does not maintain credit lines or overdrafts.

As disclosed in Note 2 (d), as at 31 December 2016, the Company's current liabilities exceed its current assets by BGN 65,986 thousand due to the fact the intercompany loan (subordinated loan) contract expires at the end of 28 April 2016 and is presented as short term.

The management of the Company is in process of negotiation of further extension of the subordinated loan with the related company from Veolia Group and expects a positive outcome. The Company has the support from the Group.

The following are the contractual maturities of financial liabilities, including estimated interest payments and excluding the impact of netting agreements:

31 December 2016
In thousands of BGN

	Carrying Amount	Contracted cash flows	Up to 1 year	Between 1 - 2 years	Between 2 – 5 years	More than 5 years
Non-derivative financial liabilities						
Loan „A”	35,747	(37,293)	(9,478)	(9,373)	(18,442)	-
Loan „B”	71,407	(72,822)	(72,822)	-	-	-
Liabilities to related parties	4,786	(4,786)	(4,786)	-	-	-
Finance lease liabilities	3,163	(3,286)	(1,346)	(1,485)	(455)	-
Trade and other payables	24,281	(24,281)	(24,281)	-	-	-
	<u>139,381</u>	<u>(142,467)</u>	<u>(112,710)</u>	<u>(10,858)</u>	<u>(18,897)</u>	<u>-</u>

The gross amounts in the preceding table are the contractual undiscounted cash flows on non-derivative financial liabilities.

As disclosed in Note 19, the Company has secured bank loan "A" with a requirement to comply with certain conditions, as upon breach of any obligation, e.g. failing to maintain debt service coverage ratio over 1.3:1 (see note 19) – the Company may fall into default and the outstanding amount of the loan may become due to the creditor. The interest payments on loans with floating interest rate in the preceding table reflect the market interest rates as at the end of the period based on EURIBOR and these amounts may vary upon change in the market rate.

Except for these financial liabilities, it is not expected that cash flows included in the table may occur much earlier or be significantly different amounts.

Market Risk

Market risk is the risk that changes in market prices, such as foreign currency exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

Currency risk

The Company is exposed to currency risk on purchases and / or sales and / or being a party in loan contracts in currencies other than the functional currency - BGN. Such transactions are denominated primarily in (EUR), (USD), (GBP) and (CZK). Since 1999 the exchange rate of the Bulgarian lev (BGN) is fixed to the euro (EUR). The exchange rate is BGN 1.95583 / EUR 1.0. Significant part of the transactions made in currency other than the local are in EUR and therefore the Company's exposure to currency risk is minimal.

• Exposure to currency risk

The Company's exposure to foreign currency risk was as follows based on notional amounts:

In thousands of	31 December 2016				31 December 2015			
	EUR	GBP	USD	CZK	EUR	GBP	USD	CZK
Trade payables	(2,103)	(1)	(326)	-	(2,087)	(1)	(326)	(87)

Financial assets	17,180	16,742
Financial liabilities	-	-
	<u>17,180</u>	<u>16,742</u>
Variable rate instruments		
Financial assets	-	-
Financial liabilities	(110,318)	(118,517)
	<u>(110,318)</u>	<u>(118,517)</u>

24. Financial instruments (continued)

Market risk (continued)

Interest rate risk (continued)

- *Sensitivity analysis against the fair value of instruments with fixed interest rate*

The Company has not accrued financial assets and liabilities with fixed interest rate at fair value, accounted through profits and loss in the Statement of comprehensive income.

A change of the interest rates by 25 basis points as at the date of financial statements would increase / (decrease) the equity and profit or loss with the amounts shown below. An assumption is made during the analysis that all other variables, especially the currency exchange rates are relatively constant. The analysis for 2015 is made on the same basis.

Effects in thousands of BGN

Capital Management

The Board of Directors' policy is to maintain a strong capital base so as to maintain customers', creditors' and market's confidence and to sustain future development of the business. The Board of Directors monitors the return on capital and the level of dividends to ordinary shareholders.

There were no changes in the Company's approach to capital management during the year. The Company was not in a breach of any of the equity requirements enforced by external authorities.

According to the second additional amendment to the Concession contract, signed on 19 March, 2008, the actual return on shareholders' capital must be at least 17%.

In accordance with the Bulgarian Commercial Act, the Company as a joint stock company should maintain net assets exceeding the registered capital. At the reporting date this capital adequacy rule is met.

Measurement of fair value

(i) Valuation technique and significant unobservable inputs

Below are the valuation techniques used in the measuring the fair value of Level 2 and Level 3, as well as the significant unobservable inputs used.

Financial instruments not measured at fair value

Other financial liabilities*, are valued on basis of discounted cash flows. As significant unobservable inputs have been used the discount rate, adjusted by the Company, taking into account the specifics of the company and the sector in which it operates. The amount of the reduction is 3% below the annual average rates for commercial loans of similar size and maturity granted in Bulgaria, according to interest rate statistics of the Central Bank for 2016.

*Other financial liabilities include secured and unsecured bank loans and finance lease liabilities.

25. Operating leases

Leases as lessee

Rental payments under operating leases are payable as follows:

<i>In thousands of BGN</i>	2016	2015
Less than 1 year	1,030	1,070
Between 1 and 5 years	2,172	2,969
More than 5 years	-	-
	<u>3,202</u>	<u>4,039</u>

Leases as lessor

The Company provides administrative services according to a contract between the parties.

<i>In thousands of BGN</i>	2016	2015
Less than 1 year	7	35
Between 1 and 5 years	3	6
	<u>10</u>	<u>41</u>

26. Employee benefits

Postemployment liabilities represent the present value of defined benefits payable at retirement with respect to age and length of service.

<i>In thousands of BGN</i>	2016	2015
Present value of the liability on 1 January	1,352	1,344
Interest expense	17	31
Current service cost	253	232
Past service cost	(76)	(121)
Actuarial loss	90	61
Paid compensations to retired employees	(157)	(195)
Present value of the liability on 31 December	<u>1,479</u>	<u>1,352</u>

Liability recognized in the Statement of financial position as at 31 December, including:	1,352	1,352
<i>Short – term liabilities for retirement compensation</i>	395	469
<i>Long – term liabilities for retirement compensation</i>	1,084	883

Expenses recognized in Statement of comprehensive income

<i>In thousands of BGN</i>	2016	2015
Current service cost	253	232
Past service cost	(76)	(121)
Interest expense	17	31

Actuarial assumptions

	2016	2015
Discount rate at 31 December	1.2%	2.3%
Salary increase (annual for 10 years)	2.50%	1.75%
Employee turnover	7%	7.5%

The actuarial assumptions for death rates are based on the National Statistics Institute's population mortality tables. For the purposes of the discounting effective annual interest rate $i = 1.2\%$ is used. This rate is based on analysis of the offered long-term investment instruments on the Bulgarian stock market (securities, municipality bonds, etc.).

26. Employee benefits (continued)

Actuarial assumptions

<i>In thousands of BGN</i>	25 basis points increase of salaries growth	25 basis points decrease of salaries growth
Effect on the liability for retirement compensation	18	(8)
<i>In thousands of BGN</i>	25 basis points increase of interest growth	25 basis points decrease of interest growth
Effect on the liability for retirement compensation	(18)	18
<i>In thousands of BGN</i>	10 basis points increase of employee turnover	10 basis points decrease of employee turnover
Effect on the liability for retirement compensation	(78)	78
<i>In thousands of BGN</i>	25 basis points increase of mortality rate	25 basis points decrease of mortality rate
Effect on the liability for retirement compensation	(12)	12

27. Contingencies

(a) Bank guarantees

Currently, the Company has the following guarantees:

Bank guarantee for good performance under the concession agreement, number PEBPRT593268, issued by HSBC France, amounting to USD 750,000, with validity until 15 December 2017.

Bank guarantee GI11.231.0090 for good performance, amounting to BGN 400,000 issued by Citibank N.A. – Sofia Branch (currently Citibank Europe AD – Bulgaria Branch) - in relation to Contract No. ПД-568-68/10.08.2011 with the Municipality of Sofia for repair of municipal property, where Sofiyska Voda AD performs construction, with validity until 31 December 2017.

Performance bank guarantee GI15.027.0019, issued by Citibank Europe AD – Bulgaria Branch for the obligations of Sofiyska Voda AD in relation to a Contract № DST-081/30.12.2011 for access to the electricity grid with Electricity System Operator EAD, amounting to BGN 6,880 and validity until 31 January 2018.

Performance bank guarantee GI15.027.0020, issued by Citibank Europe AD – Bulgaria Branch for the obligations of Sofiyska Voda AD in relation to a Contract for transmission through the electricity grid with Electricity System Operator EAD, amounting to BGN 859 thousand and validity until 31 January 2018.

(b) Infrastructure

In accordance with a contract dated 8 July 2005 between the Republic of Bulgaria, presented by the Minister of the Economy and Energy (the State) on the one side and Business Park Sofia EOOD and Lindner AG, Germany (the Investor) on the other side, the State has financed the construction and rehabilitation of elements of the technical infrastructure within the boundaries of “Sofia Park” project – buildings, roads and technical infrastructure. In compliance with a decision of the Supreme Administrative Court dated 07.06.2007 and the preceding decision of the Commission on Protection of Competition from October 2005, Sofiyska Voda AD and Sofia Municipality have signed an annex to Second Additional Agreement to the Concession Contract, stated in Annex 1 to Decision No.620 of Sofia Municipal Council under Protocol No.22/09.10.2008.

Article 2 of the Annex states a procedure and a formula for the calculation of the annual amount of the consideration that will provide equivalence and reimbursement of the value of the W&S facilities in such a pattern that the granted State capitals will not be considered State aid. As per Art.2.1. of the Annex “the amount of the consideration is different in the different years and depends on the annual expenditure of the Concessionaire, realized through or in relation to commissioning of the new assets.” As per protocol by the Municipality of Sofia (MoS) and Sofiyska Voda AD dated 12 July 2016 the initial calculated amount in 2015 was increased from BGN 46,5 thousand to BGN 49,6 thousand. Consequently, the total accrued amount in 2016 is split as follows:

<i>In thousands of BGN</i>	Total in 2016	Accrual for 2016	Additional amount as per MoS protocol	2015
Water Supply	46,7	44,6	2,1	36,8
Sewerage	5,6	5,2	0,4	4,1
Waste Water Treatment	6,9	6,3	0,6	5,6
Total:	59,2	56,1	3,1	46,5

Based on those calculations, the revenue stated in Note 4 has been respectively decreased regarding the three types of services – water supply, sewerage and waste water treatment – by the total amounts stated above and a liability to Municipality of Sofia has been presented.

28. Commitments

Concession agreement

On 23 December 1999 Sofiyska Voda AD signed a Concession Contract with the Municipality of Sofia, which is effective as of 6 October 2000, after all the preliminary conditions have been satisfied.

As per the Concession Contract the Municipality of Sofia grants and Sofiyska Voda AD receives:

- a specific right to use public assets;
- an exclusive right to render water supply, sewerage and waste water treatment services within the concession area.

Sofiyska Voda AD has the right to invoice the customers and to collect the amounts for its benefit and at its expense. The risk of non-collected receivables is completely at its risk.

The term of the concession contract is 25 years. The contract does not define any concession fees to be paid.

As per Annex 5 to the Initial Concession Agreement during the first 15 years Sofiyska Voda AD is obliged to reach the amount of USD 153 million of investments. After that period no further investments are specified in the Agreement.

After the Law for Regulating the Water and Sewerage Services became effective in 2006, Sofiyska Voda's operations are directly regulated by the Energy and Water Regulatory Commission (EWRC, the Commission).

Key powers of the Commission in regulating the activities in the water supply and sewerage (W&S) services sector are as follows:

- Regulates the quality of W&S services;
- Carries out price regulation of the W&S services;
- Handles complaints of customers against W&S operators;
- Approves the common terms and conditions of contracts for the provision of W&S services to consumers;
- Exercises control and imposes sanctions;
- Keeps a register of W&S services assignment contracts;
- Approves proposed by the W&S operators business plans;
- Carries out preliminary control, delivers an opinion on the compliance of concession and other types of W&S system managing contracts in the process of their preparing and the regulations for its implementation.

More precisely, what is under regulation are the prices of the services and their quality, assessed by the so-called "key- performance indicators" (KPI). In order to reach the level of services, 5-year business plans are prepared (after the 3-year business plan for the period 2006-2008), and they bind the price of the services, the investment program and the KPIs as issued by EWRC Ordinances and Instructions.

In that relation, in January 2009 the renegotiations for amendments in the concession contract aiming to harmonize it with the requirements of the new regulations, have been finalized. According to the agreed, the levels of investments were to be set in the business plans, which had to be preliminarily coordinated with the Municipality of Sofia.

28. Commitments (continued)

Concession agreement (continued)

Business plan 2006-2008 was approved in 2007. In the end of October 2008 Business plan 2009-2013 was approved, which envisaged achieving of the compulsory levels of services and an investment program of BGN 240 million for the 5-year period. Failure to achieve at least 75% of the total of investments set in the Business plan for two consecutive years with approved prices of services or double failure to meet the levels of services, acknowledged by a penalty decree issued by EWRC and accompanied by a proposal to Municipality of Sofia (MoS) would be legal grounds for the initiation of a concession termination procedure by MoS.

Although the fact that the regulatory period 2009-2013 has been extended twice in the following years as per decision of the Commission, initially until 2015 and subsequently until 2016 (see note Commitments, below), for the original regulatory period 2009-2013, the company has performed BGN 241.6 million of investments, which fulfills the company's obligation to perform investments for BGN 240 million.

According to the concession agreement, a special Concession Monitoring Unit (the "CMU") was established by the Grantor (MoS) for the purposes of monitoring and ensuring compliance by the Concessionaire with the provisions of this Concession Agreement.

The Company has obligations to cooperate with the CMU to facilitate the monitoring of the performance and the delivery of services, prepare and submit to CMU various reports and accounts etc.

Between the 54th and 48th months before the expected expiration date of the Concession Sofiyska Voda AD and the Municipality of Sofia are due to commit to a mutual verification of the public assets. No later than 24 months before that date the parties agree on the way of handing in the assets and the operations.

As of the 15th Contractual year until the end of the period of the concession contract, Sofiyska Voda AD is due to transfer 1% of its annual distributable profit to a special "handback account". The financial result for the year ending on 31 December 2015 was the first annual profit from which the Company was distribute 1% to the special account in 2016. The money from the Handback Account may be used before the Expiry Date during the last Regulatory Period to pay for construction works only. Such works shall be identified in the Handback Schedule established in accordance with the concession contract, but may not be part of the last Business plan. The Handback Account shall be transferred to "Vodosnabdiyavane I Kanalizacion" EAD on the Expiry Date by the Concessionaire on receipt of a handback certificate issued by the Grantor to the Concessionaire. The accumulated in the special account amount covers completely Sofiyska Voda AD's liabilities with regards to Handback obligations.

Regarding the special right to use public assets and to render services of water supply, sewerage and waste water treatment to the consumers within the concession territory (service commitment), an intangible asset named "concession right" has been recognized. The carrying amount of the concession right as at 31 December 2016 is BGN 270,689 thousand (2015: BGN 261,476 thousand).

For 2016 the investments under the extended business plan amounted to BGN 42,539 thousand (2015: 34,399 thousand), of which BGN 37,907 thousand (2015: BGN 30,797 thousand) represented investments in improvements of old public assets or acquiring new ones, which led to recognizing revenue from construction (see Note 7).

For the period since the beginning of the Concession until the end of 2016 the amount of investments made is BGN 572,205 thousand.

28. Commitments (continued)

Investment commitments

Complying with Art. 14, para 3 and 4 of the transitional and final provisions of the Water Act, on 4 March 2014 Sofiyska Voda AD submitted an extension of the Business Plan 2009-2013 until 2015. Concurrently, an application for approval of prices for 2014 was submitted. Subsequently, following the written instructions of the Commission for amendments of the submitted business plan for the extended period, on 31 July 2014 the Company submitted a revised Business Plan 2009-2015. The investments planned for the period 2014-2015 for regulatory purposes exceed BGN 87.6 million. The 2009-2015 Business Plan was approved by the Regulator with a decision № БП – 57 dated 6 August 2015.

In compliance with the amendments of the Water Act, paragraph 60 published in the Stated Gazette issue 58/2015 on 2 November 2015 Sofiyska Voda AD submitted and extended the aforementioned Business Plan until 2016. After the revisions made in compliance with regulatory decision № БП-76/22.12.2015, the revised Business Plan 2014-2016 was submitted on 8 Jan 2016 which was consequently approved on 12 February 2016.

The approved investments for regulatory purposes for the 2014-2016 period are as follows: BGN 68,447 thousand for 2014-2015 and BGN 57,469 thousand for 2016. The prices for regulated services remain unchanged until Decision of Energy and Water Regulatory Commission № C-8 of 28.04.2016, which approved the first increase of the complex price of water and sewerage services (3.4% for household and equivalent users) from their latest update in effect from 1 July 2012.

29. Deferred income

On 16 January 2009, the Company signed a Settlement agreement with the Municipality of Sofia (MoS). With this agreement, both sides agreed fully and finally on all existing mutual claims against each other with relation to the Concession agreement. Both sides mutually relieve each other from pretended payment of interest on amounts claimed, as Sofiyska voda accepted the obligation for investments in the period 2009-2023 in addition to already existing and approved the Regulator investment obligations in the Business plan as follows: BGN 2.5 million for the period 2009-2013, according to Art.5.1.(iii) from the Settlement agreement, BGN 5 million in the period 2014-2018 according to Art 6.1.(i) from the Settlement agreement and BGN 4.7 million in the period 2019-2023 according to Art. 6.1.(ii) from the Settlement agreement.

The first obligation for BGN 2.5 million in the period 2009-2013 was fulfilled in February 2014. The second and third obligations are to be fulfilled in the period 2016-2023. In 2016 were made investments in the amount of BGN 1,16 mil and for the following five-year period 2017-2021 amount to BGN 6.5 mil. The final BGN 2 mil will be fulfilled in the period 2022-2023.

As the above amounts from the Settlement Agreement are outside the investments set in the Business plan and are on the account of Sofiyska voda, they have been accounted initially as expense and liability. After which the liability is decreased with the amount invested for all assets constructed and put into use, which amount is presented as deferred income. Thereafter, deferred income is decreased proportionately to the depreciation expense of the constructed assets.

30. Related parties

The Company has a related party relationship with its parent company – “Veolia Voda (Sofia) B.V.” (77.10% of the Company’s shares), as well as with the companies within Veolia Group and with its minority shareholder-Vodosnabdyavane i kanalizatsiya EAD (ViK) (22.9%). The ultimate parent company is Veolia Environnement S.A., France.

The related parties of the Company are the ultimate parent company and all companies under common control and key management personnel. As the minority shareholder ViK is solely owned by Sofia Municipality (MoS), thus being government related entity, related parties are also companies which are under the control of the same Government,

The Company has performed analysis over the individually and collectively significant transactions with companies under the control of the Government, which are as follows:

- Construction revenue and expenses with MoS (disclosed in Note 6);
- Green energy income with National Electricity Company EAD-state owned (disclosed in Note 5);
- Under a contract signed with NEK EAD, the latter has invoiced to Sofiyska Voda BGN 1,215 thousand (without VAT) for water that Sofiyska Voda has purchased and has run through NEK’s plants in order for the water to reach the suburban area of Sofia. The expense is recognized in Expenses for materials – Electricity, water, heating. On the other hand, Sofiyska Voda has invoiced to NEK BGN 1,215 thousand (without VAT) due to the fact that NEK has generated electricity from the water running through their plants. The revenue has been recognized in Revenue from water supply.

The subsidiary in the financial statements of Sofiyska Voda AD is Water Industry Support and Education EOOD, where Sofiyska Voda AD owns 100% of the capital (2015: 100%).

Sofiyska voda AD

Opinion

We have audited the separate financial statements of Sofiyska voda AD (‘the Company’) as set out on pages 3 to 59, which comprise the separate statement of financial position as at 31 December 2016, and the separate statement of profit or loss and other comprehensive income, separate statement of changes in equity and separate statement of cash flows for the year then ended, and notes to the separate financial statements, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying separate financial statements give a true and fair view of the unconsolidated financial position of the Company as at 31 December 2016, and of its unconsolidated financial performance and its unconsolidated cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union (EU).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the ‘Auditors’ Responsibilities for the Audit of the Separate Financial Statements’ section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants’ Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements of the Independent Financial Audit Act (IFAA) that are relevant to our audit of the separate financial statements in Bulgaria, and we have fulfilled our other ethical responsibilities in accordance with the requirements of the IFAA and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Separate Financial Statements and Auditors' Report Thereon

Management is responsible for the other information. The other information comprises the management report, including the corporate governance statement prepared by management in accordance with Chapter Seven of the Accountancy Act, but does not include the separate financial statements and our auditors' report thereon.

Our opinion on the separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon, unless and to the extent explicitly specified in our report.

In connection with our audit of the separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Additional Matters to be Reported under the Accountancy Act and the Public Offering of Securities Act

In addition to our responsibilities and reporting in accordance with ISAs, in relation to the management report and the corporate governance statement, we have also performed the procedures added to those required under ISAs in accordance with the Guidelines of the professional organisation of certified public accountants and registered auditors in Bulgaria, i.e. the Institute of Certified Public Accountants (ICPA), approved by its Management Board on 29 November 2016. These procedures refer to testing the existence, form and content of this other information to assist us in forming opinions about whether the other information includes the disclosures and reporting provided for in Chapter Seven of the Accountancy Act and in the Public Offering of Securities Act (Art. 100m, paragraph 10 of the POSA in conjunction with Art. 100m, paragraph 8 (3) and (4) of the POSA) applicable in Bulgaria.

Opinion in connection with Art. 37, paragraph 6 of the Accountancy Act

Based on the procedures performed, our opinion is that:

- a) The information included in the management report for the financial year for which the separate financial statements have been prepared is consistent with those separate financial statements.
- b) The management report has been prepared in accordance with the requirements of Chapter Seven of the Accountancy Act and of Art. 100(m), paragraph 7 of the Public Offering of Securities Act.
- c) The corporate governance statement for the financial year for which the separate financial statements have been prepared presents the information required under Chapter Seven of the Accountancy Act and Art. 100 (m), paragraph 8 of the Public Offering of Securities Act.

Opinion in connection with Art. 100(m), paragraph 10 in conjunction with Art. 100 m, paragraph 8(3) and (4) of the Public Offering of Securities Act

Based on the procedures performed and the knowledge and understanding obtained about Company's activities and the environment in which it operates, in our opinion, the description of the main characteristics of entity's internal control and risk management systems relevant to the financial reporting process, which is part of the management report (as a component of the content of the corporate governance statement) and the information under Art. 10 paragraph 1(c), (d), (f), (h) and (i) of Directive 2004/25/EC of the European Parliament and of the Council of 21 April 2004 on Takeover Bids, do not contain any material misrepresentations.

Responsibilities of Management and Those Charged with Governance for the Separate Financial Statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with IFRS as adopted by the EU and for such internal control as management determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

INDEPENDENT AUDITORS' REPORT

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
